How to Add Jitsi Meeting in MultiVendorX with Jitsi Meet Multivendor Addon

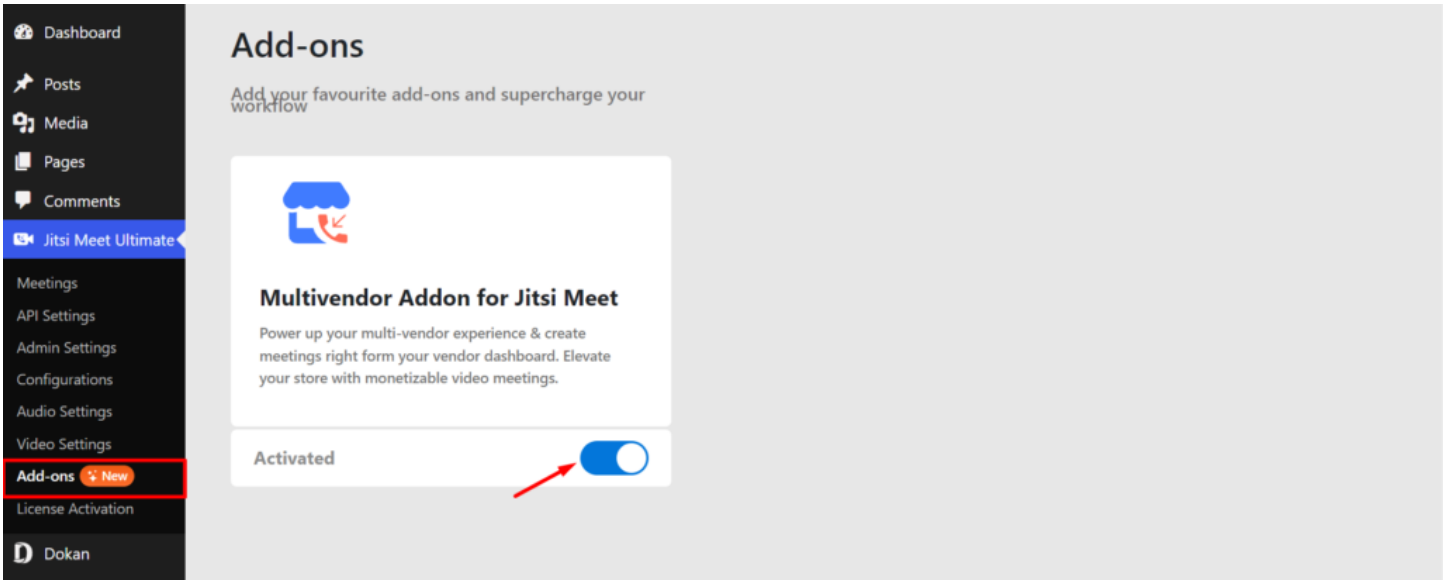

FlexMeeting - Webinar and Video Conference with Jitsi Meet · https://wppool.dev/docs/how-to-add-jitsi-meeting-in-multivendorx/

Starting with the Webinar & Video Conference with Jitsi Meet v2.4.0, you can now create and sell webinars from the MultiVendorX plugin for WordPress. This feature provides a new way to scale up your business and provide the luxury to your store owners to sell video meetings as products.

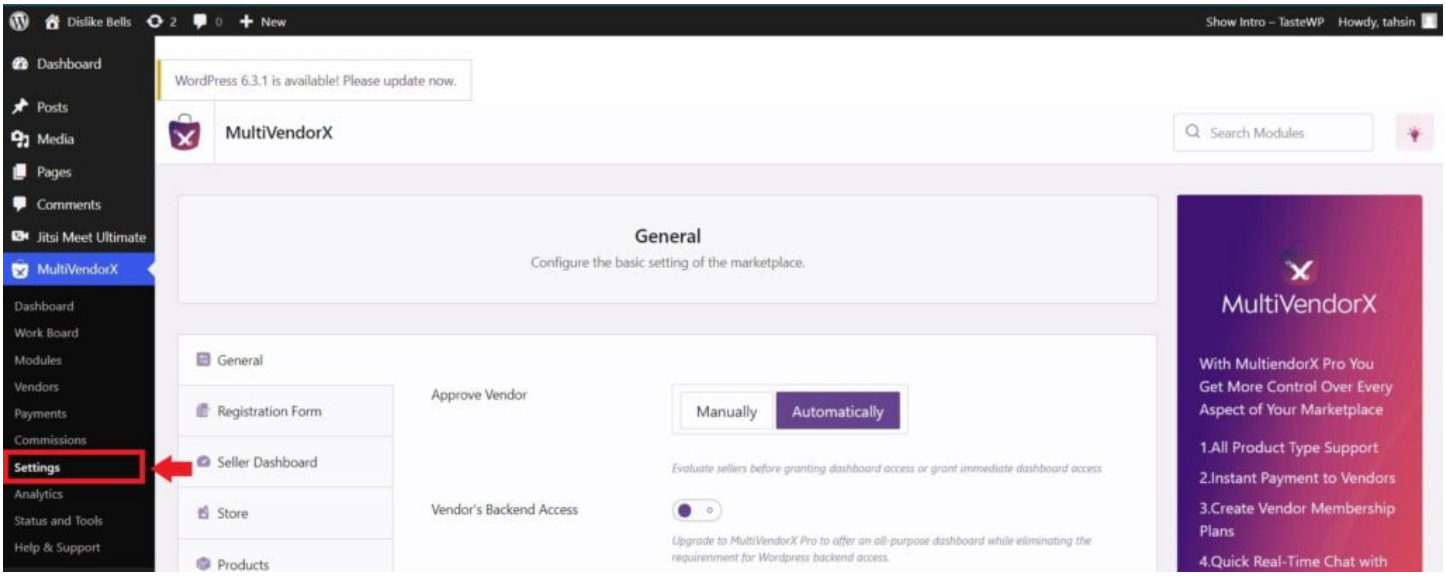

Before we start, make sure you have already installed and activated WooCommerce and MultiVendorX on your website.

Also, Multivendor Addon is a premium feature that is now available with the Jitsi Meet Ultimate package.

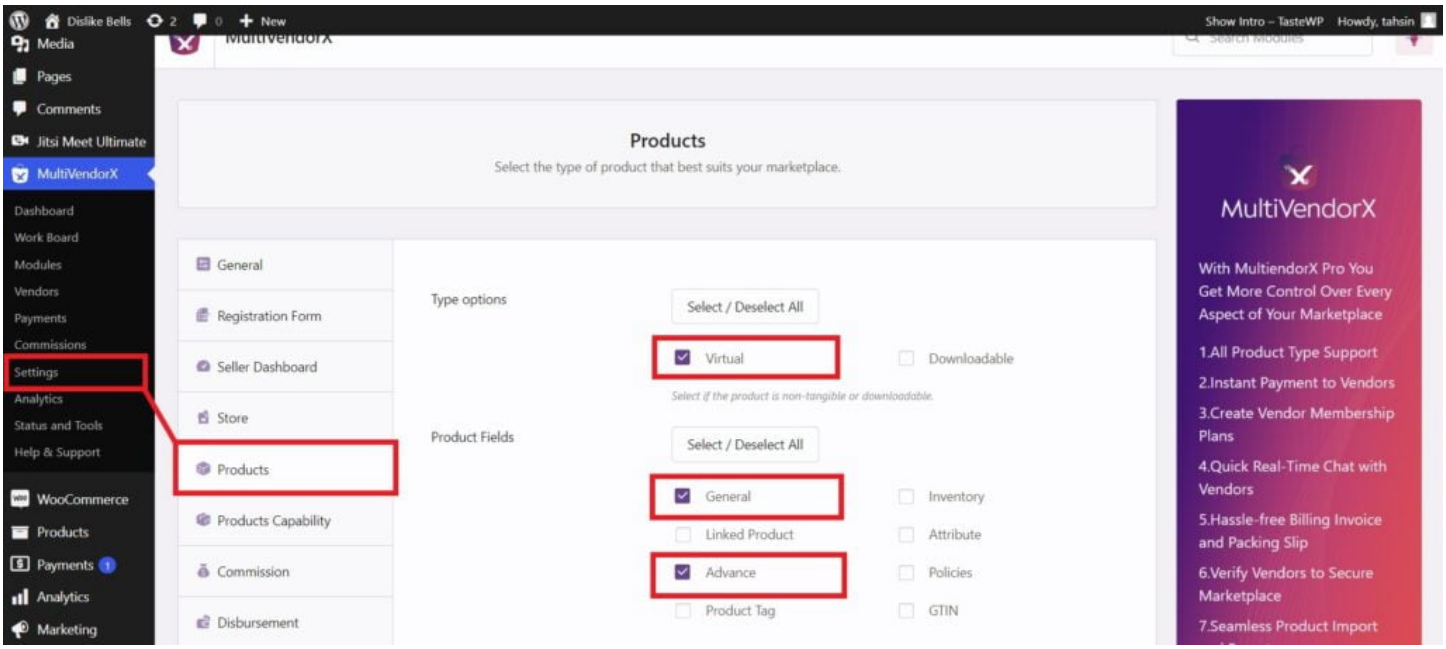

First, navigate to the new Add-ons menu from Jitsi Meet Ultimate and install and activate the **Multivendor Addon for Jitsi Meet**.

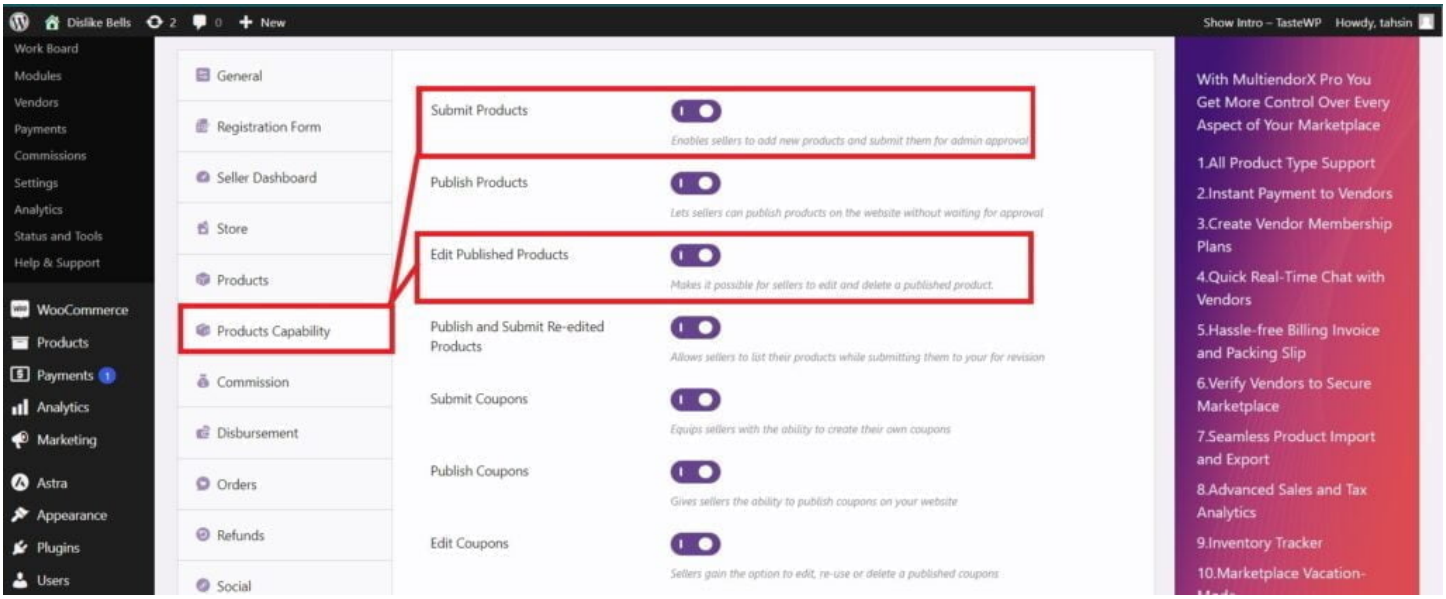

Next, go to your MultiVendorX dashboard and click on **Settings**.

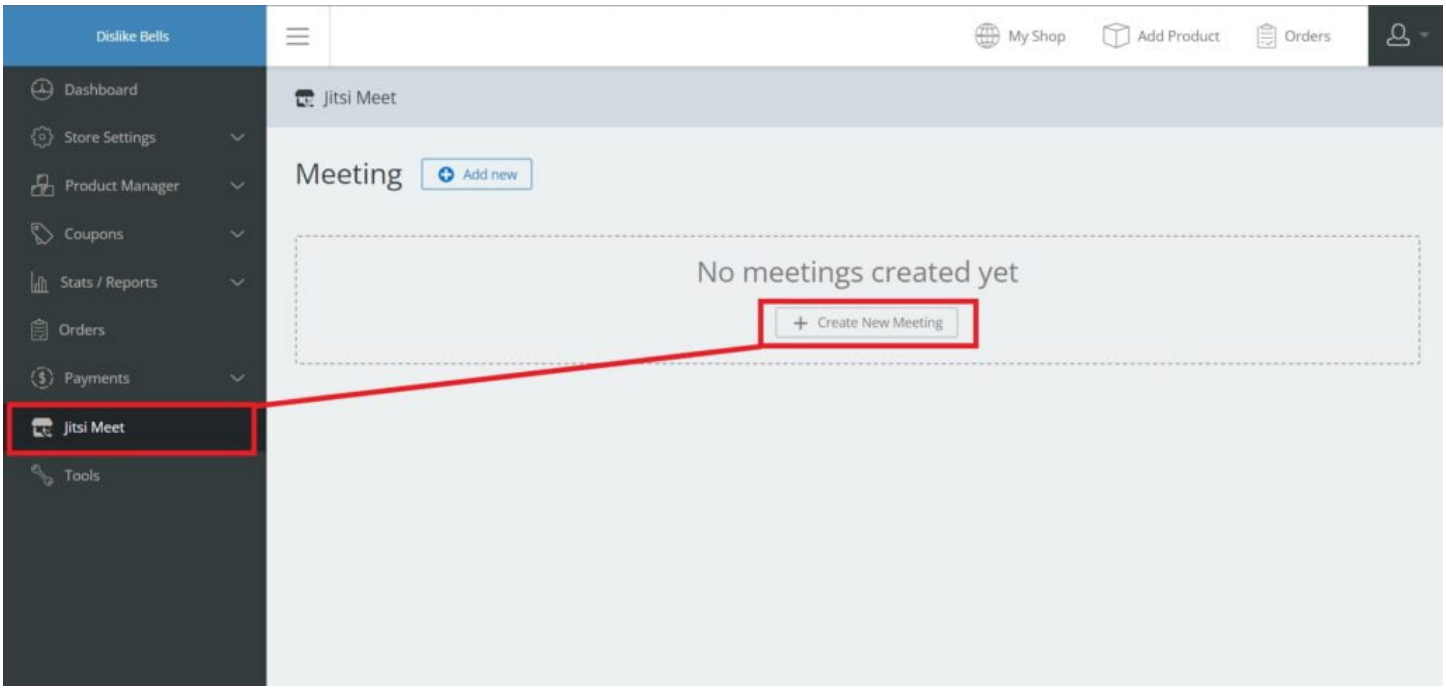

Now, under **Settings** go to '**Products**'. Check the box of **Virtual, General,** and **Advance** from there.

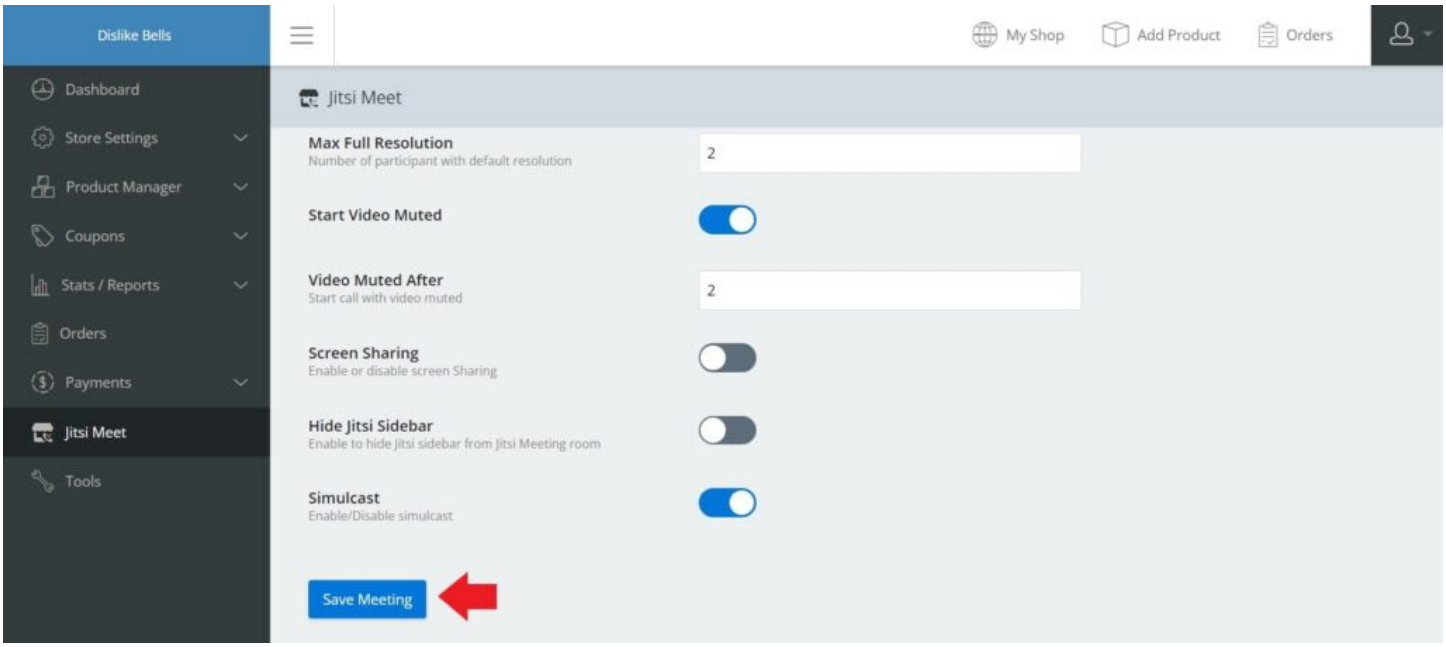

Then go to **Products Capability**, and allow the button to **Submit Products, Edit Published Products,** and then others as you wish.

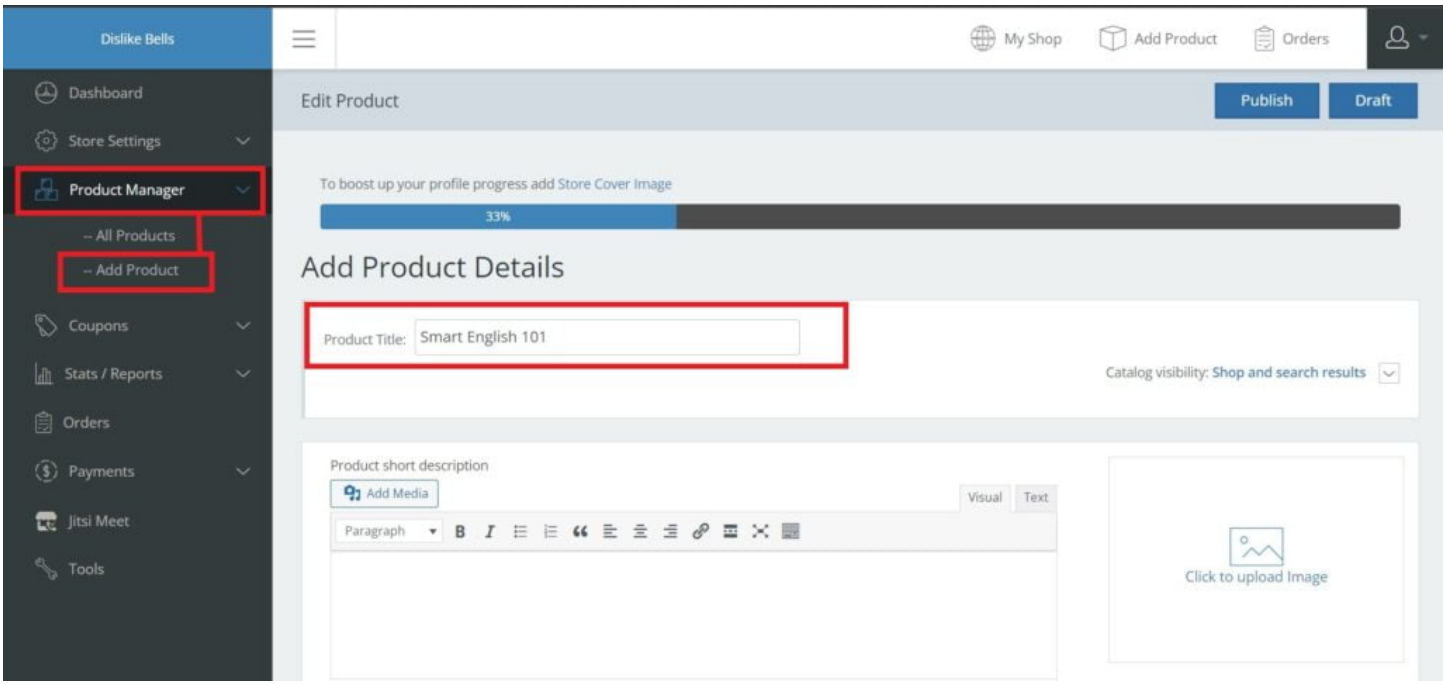

Now, log in to your vendor dashboard from your website. There you will find an option for Jitsi Meet now, from where you can create meetings directly.

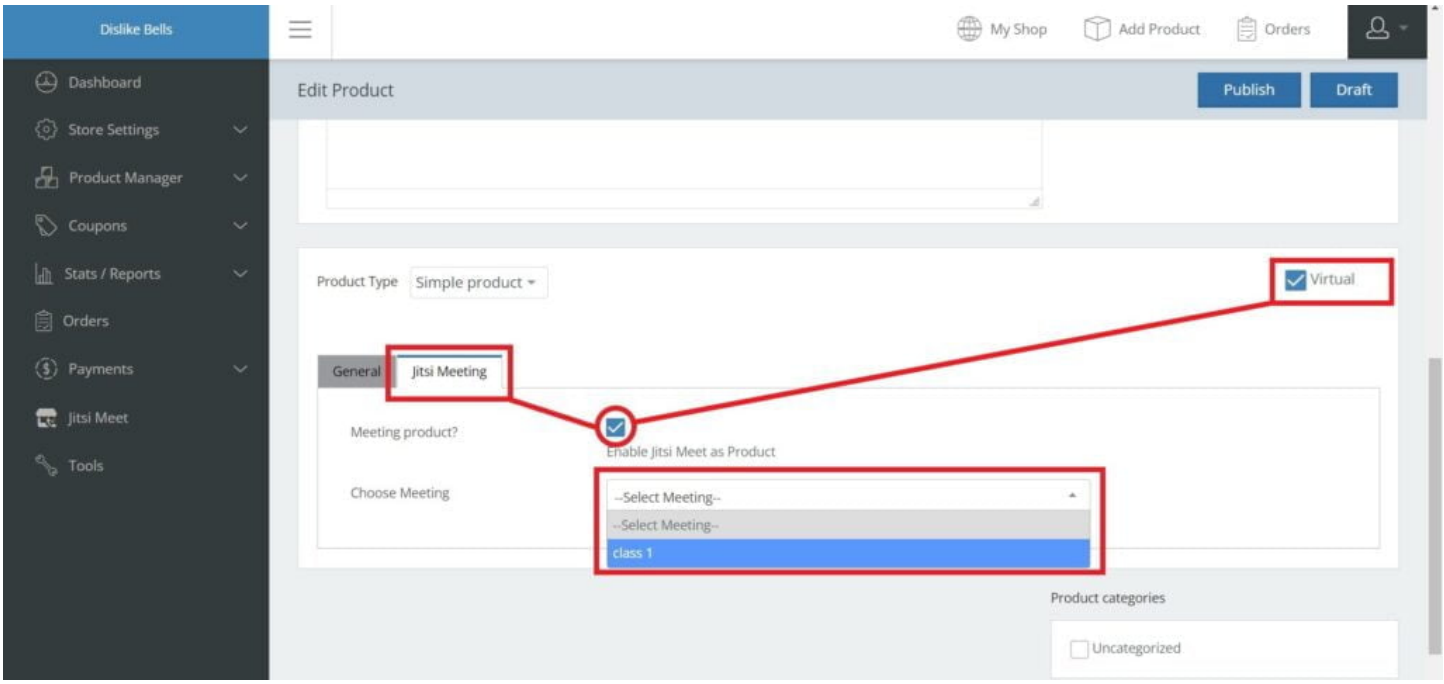

Click on '**Create New Meeting**', give the meeting a **Title**, change the settings according to your preference, and then click on **Save Meeting**.

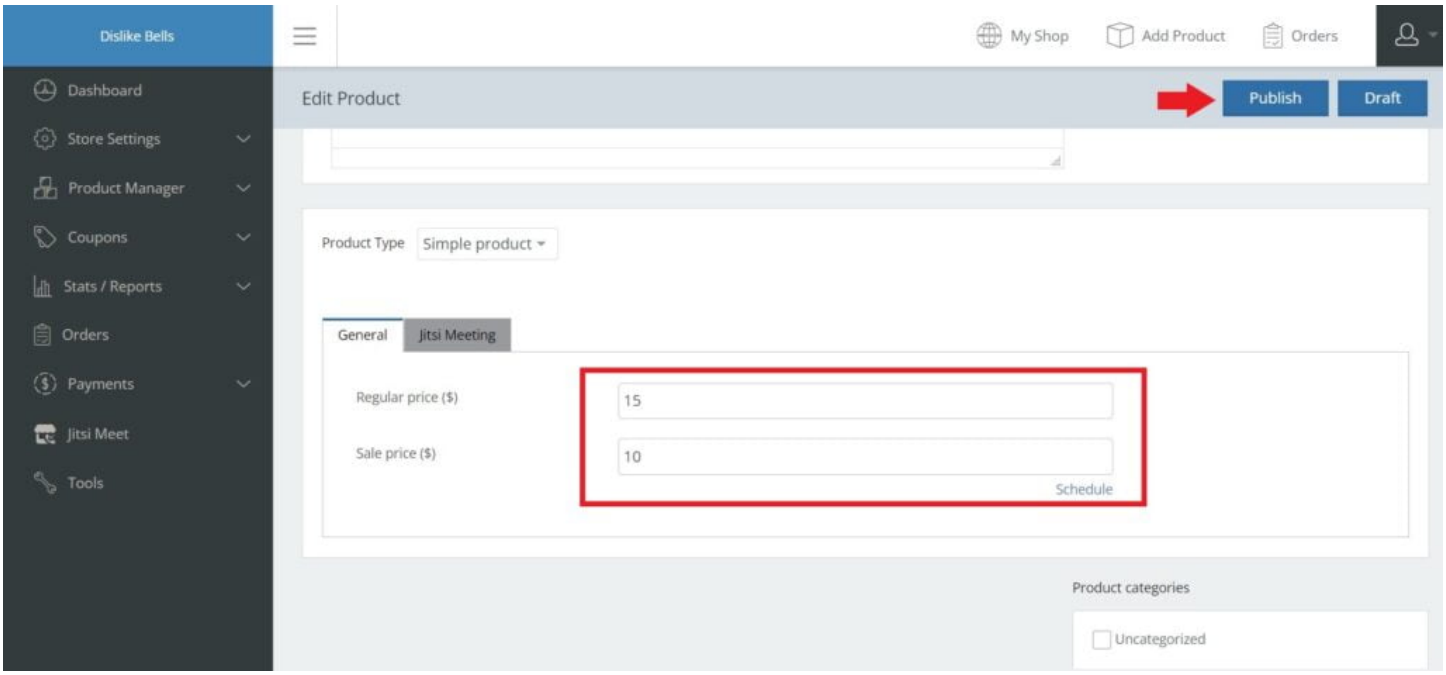

Then go to '**Product Manager**' on the dashboard and click on **Add Product**. There set your Product Title and other information as you see fit.

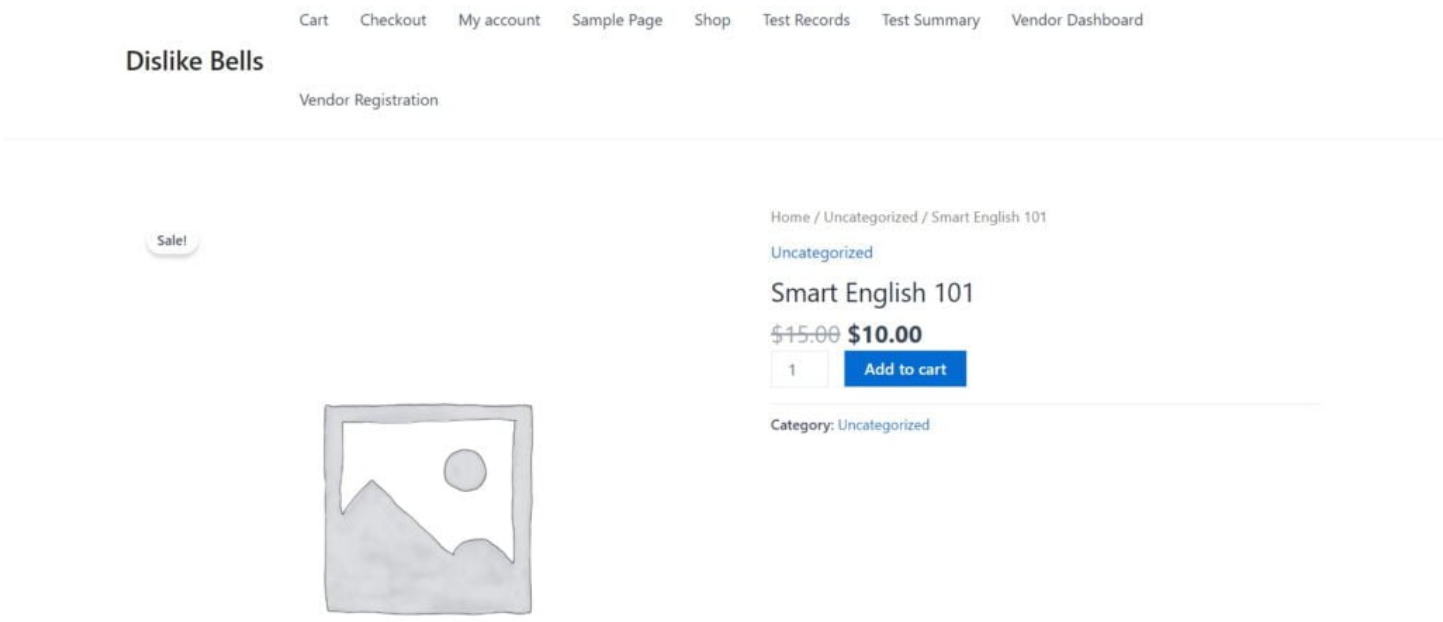

Now go to the bottom of the page. There you will see a tab for the **Jitsi Meeting**. From there, check the box that says '**Enable Jitsi Meet as Product**' and then check '**Virtual**' on the right corner. Then you will see the option to choose the meeting you created from there. Make sure to choose the meeting you want to sell as a product.

Then go to the **General** tab on the left side and set the price you want for the meeting.

Finally, hit '**Publish**' to list the meeting in products.

Your meeting is now available in your shop. Enjoy earning!
