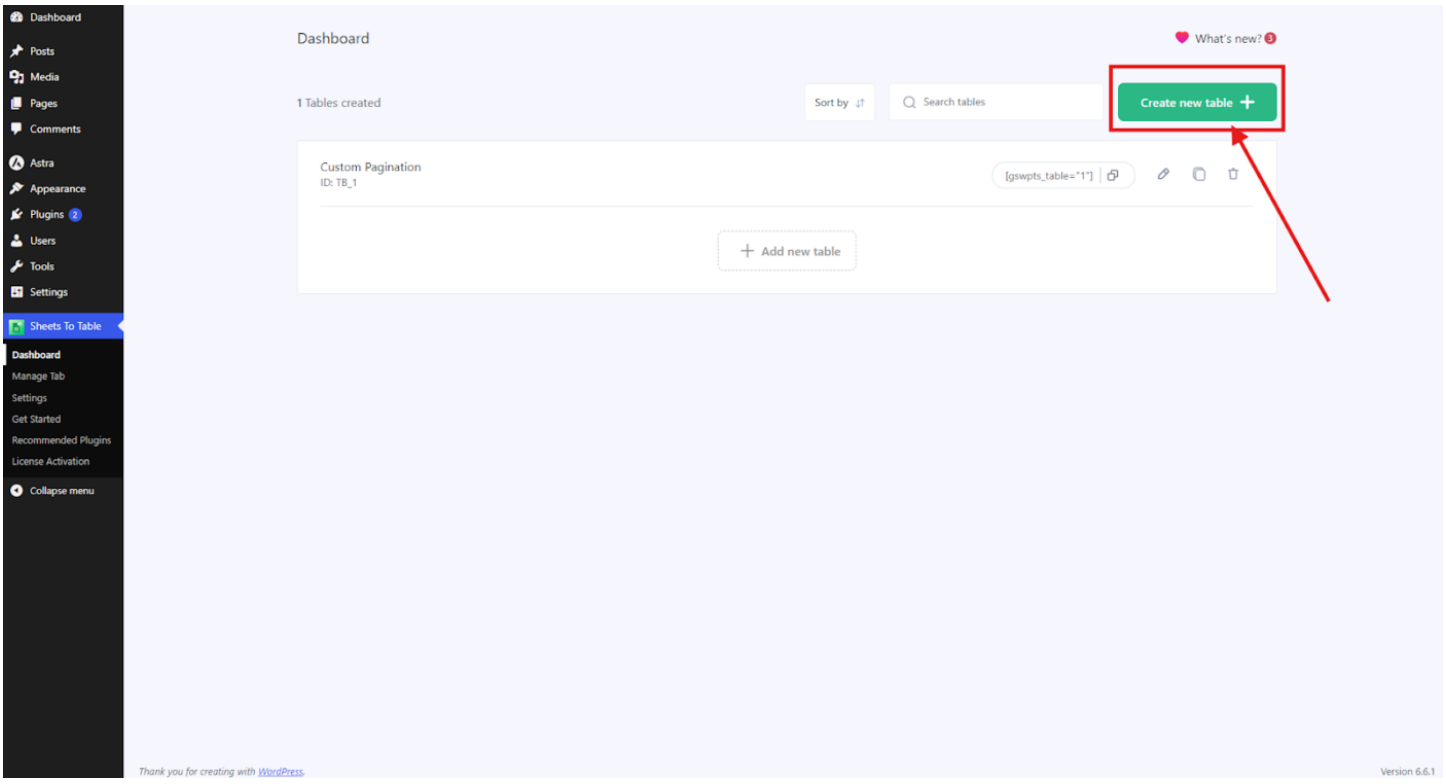
How to customize table pagination in WordPress

FlexTable - Sheets to WP Table Live Sync · https://wppool.dev/docs/how-to-customize-table-pagination-in-wordpress/

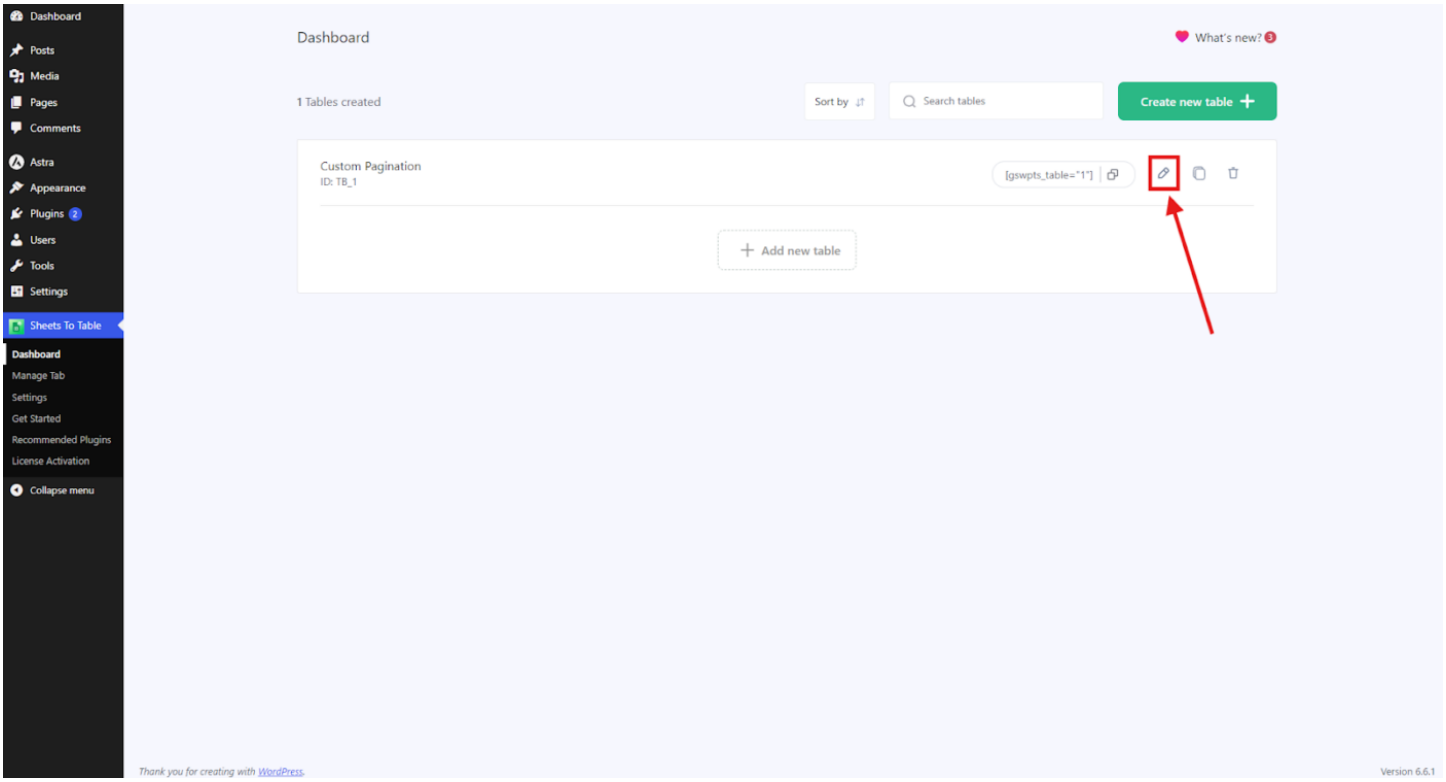
With the **Sheets to WP Table Live Sync** plugin, you can easily customize the look and feel of your table pagination. Whether you're looking to change the pagination style, colors, or alignment, this guide will walk you through the steps to make your tables look exactly how you want them.

Before proceeding, make sure you have both the **Free** and **Pro** versions of the **Sheets to WP Table Live Sync** plugin **installed** and **activated** on your WordPress site.

To get started, navigate to the Dashboard menu of "**Sheets to WP Table**" in your **WordPress dashboard** and create a new table.

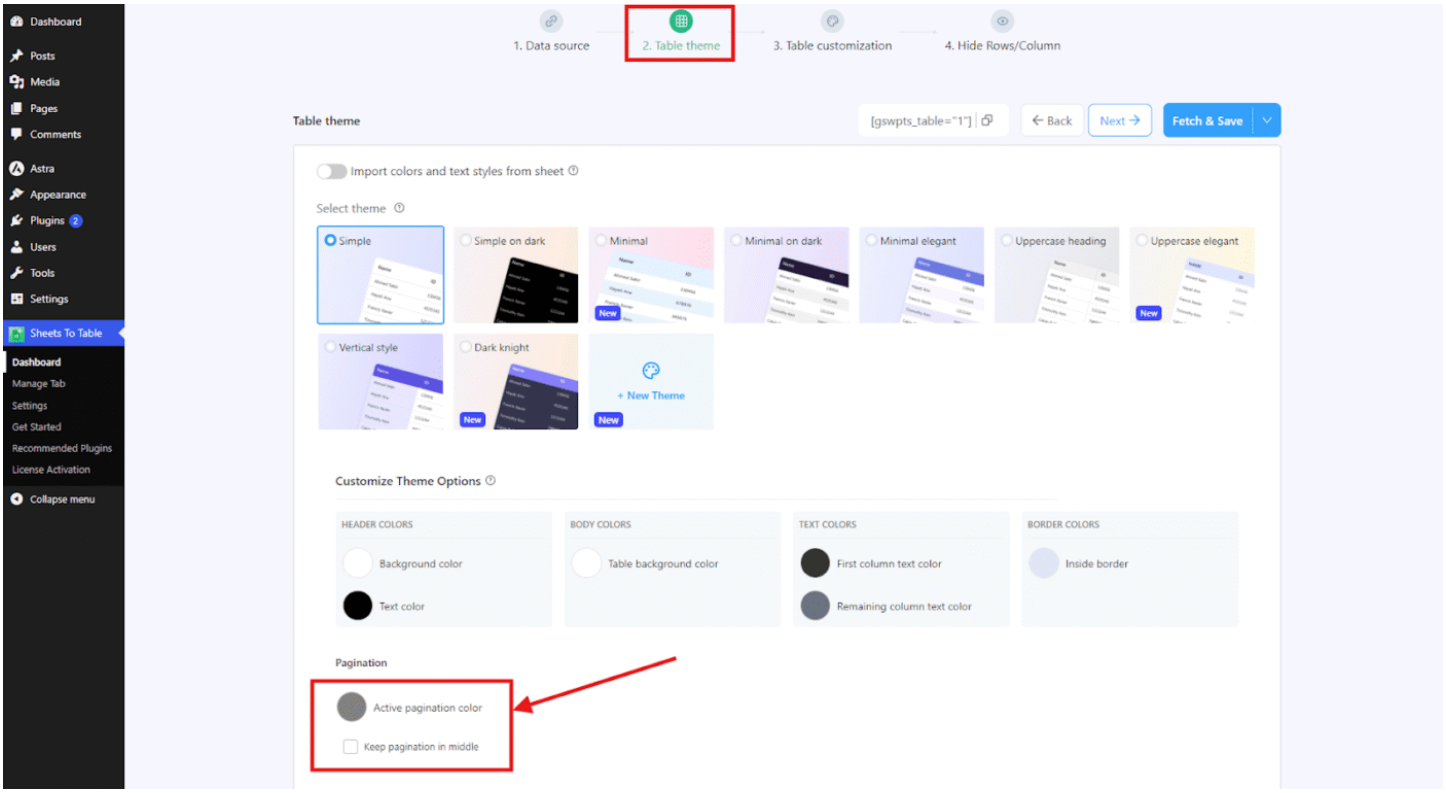


You can also edit an existing one by clicking on the **edit table** option.

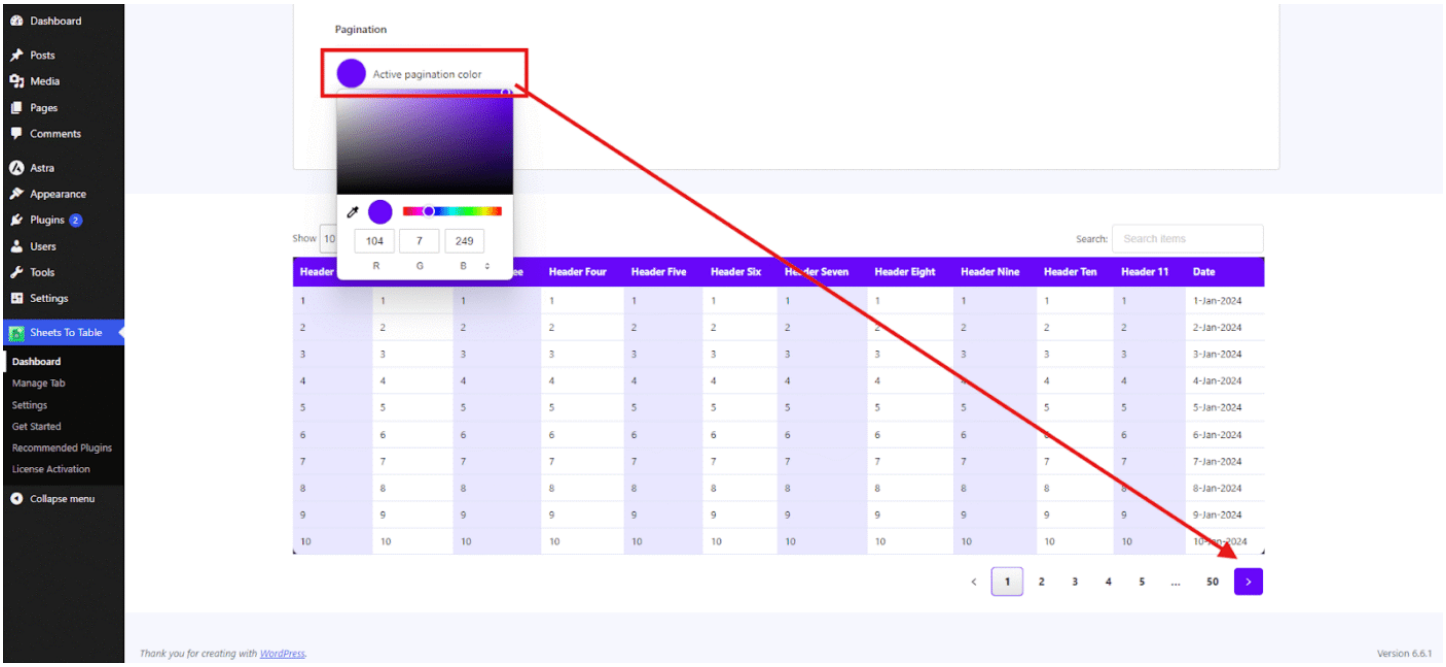


Once you're in the table editor, head over to the **Table Theme** tab. This is where you'll find various customization settings for your table's appearance, including the pagination options.

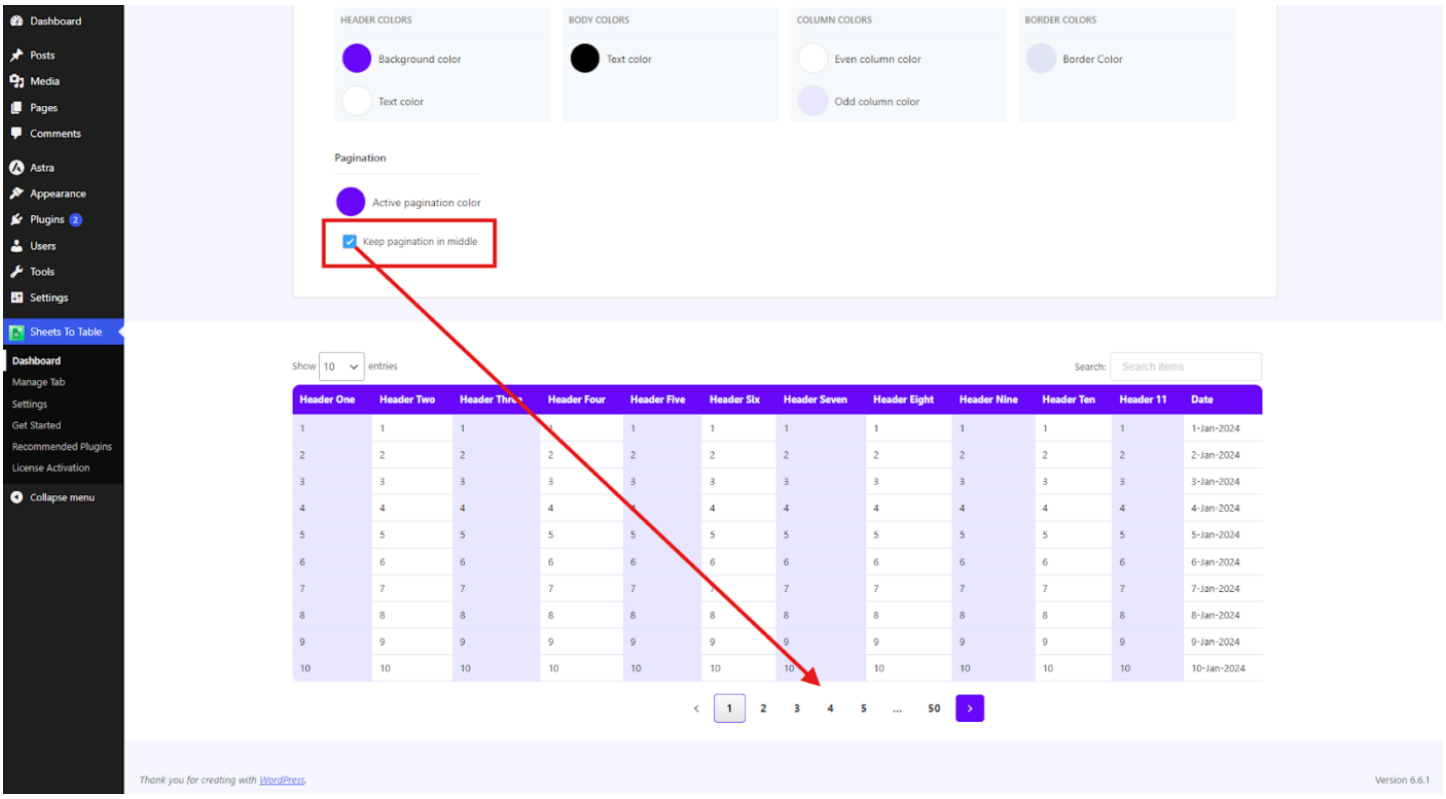
In the **Pagination** section, you can adjust the pagination style to suit your needs.



You can change the **Active pagination color**. The live preview below will reflect your changes in real time.

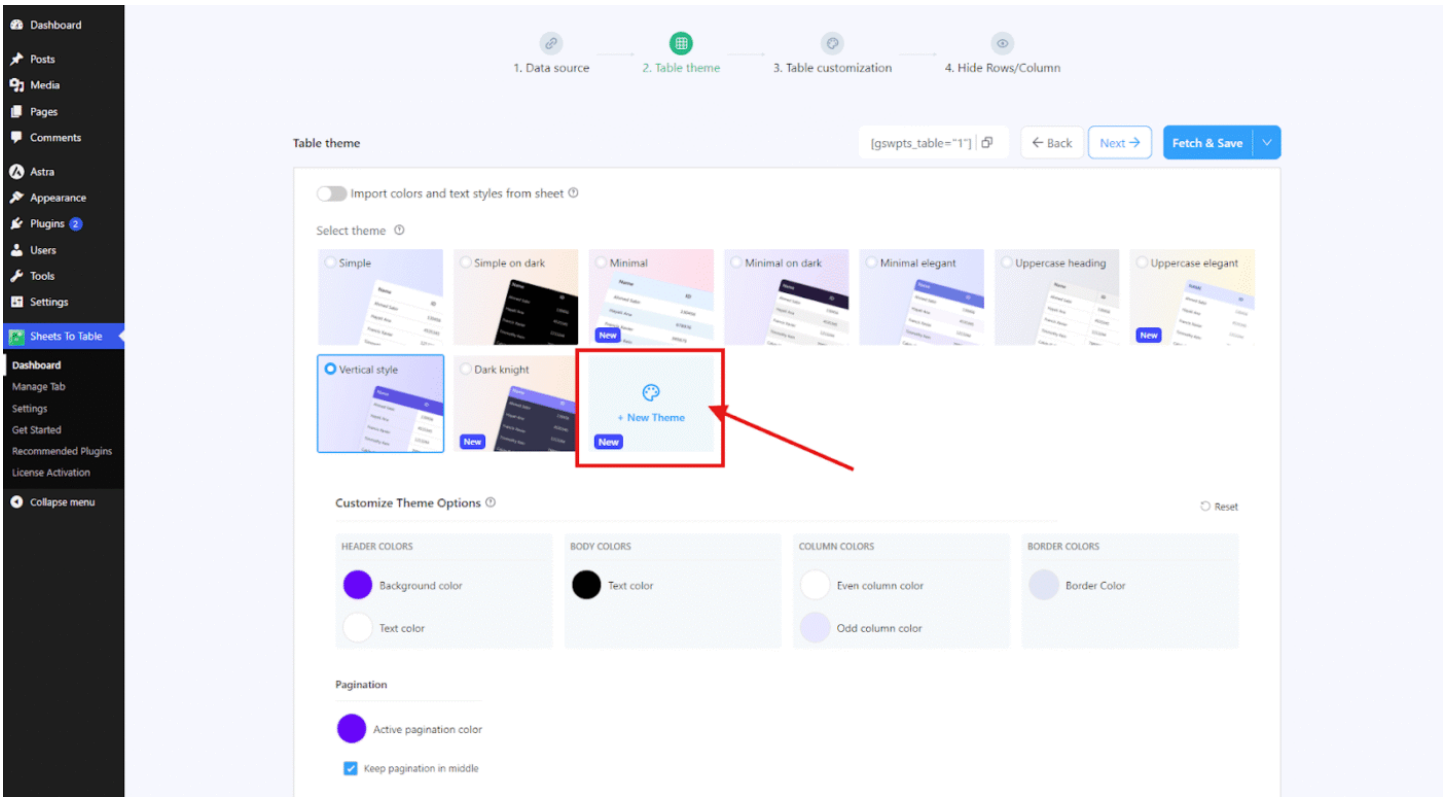


If you enable the **Keep Pagination in Middle** option, your pagination will be centered on the page for a cleaner and more balanced look.

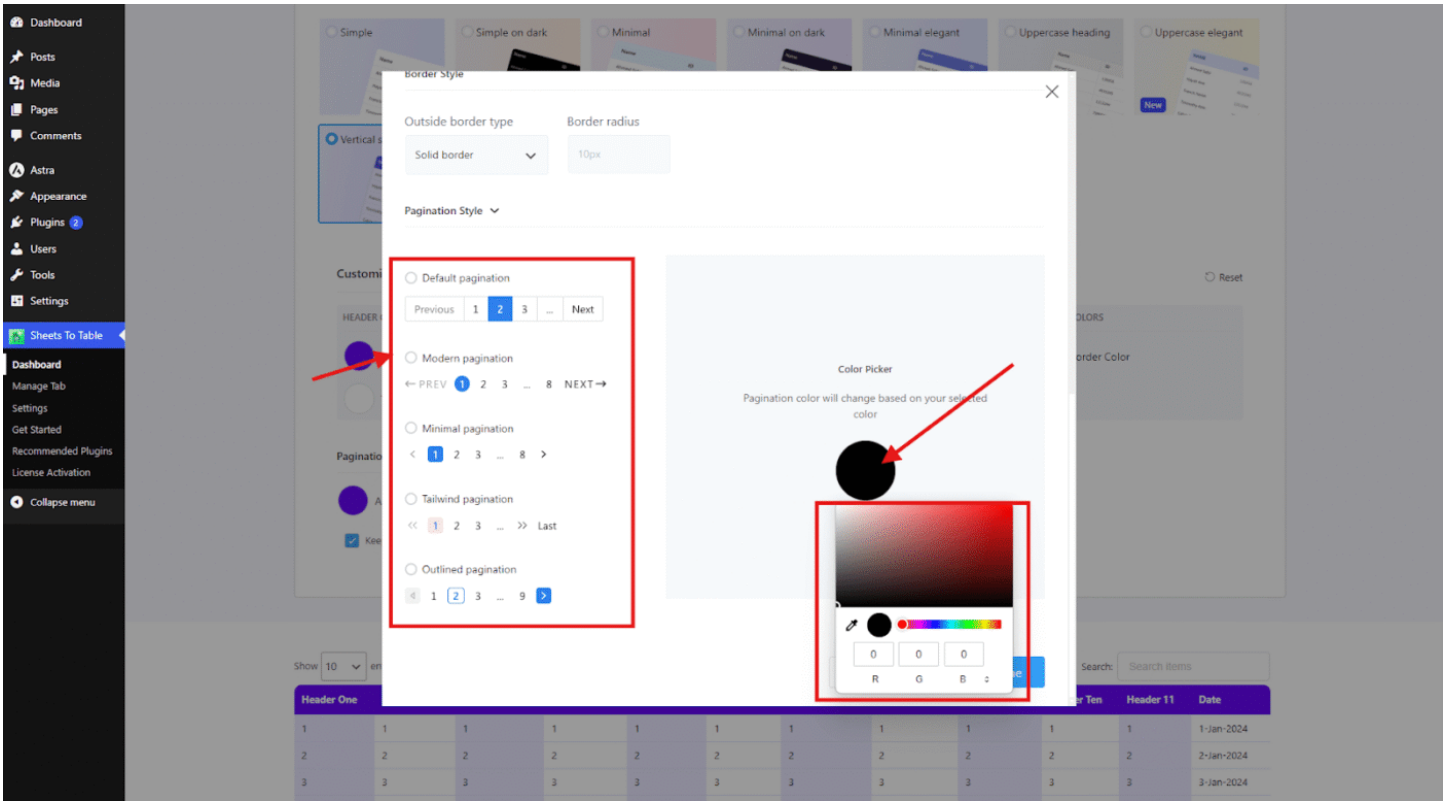


Advanced Customization

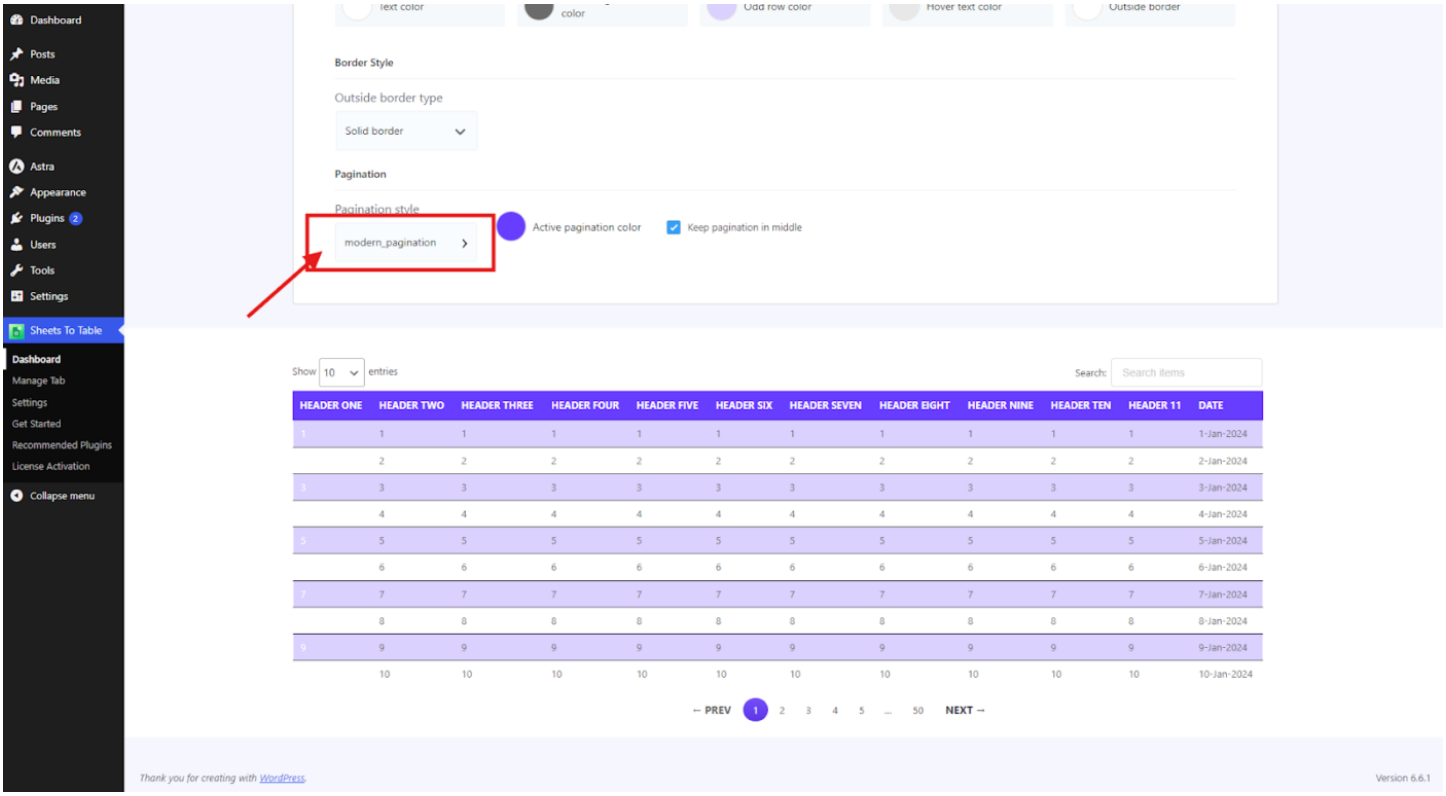
You can get more control over the pagination design, by creating a New Theme. Scroll down in the theme options to find the **Pagination Style** settings.



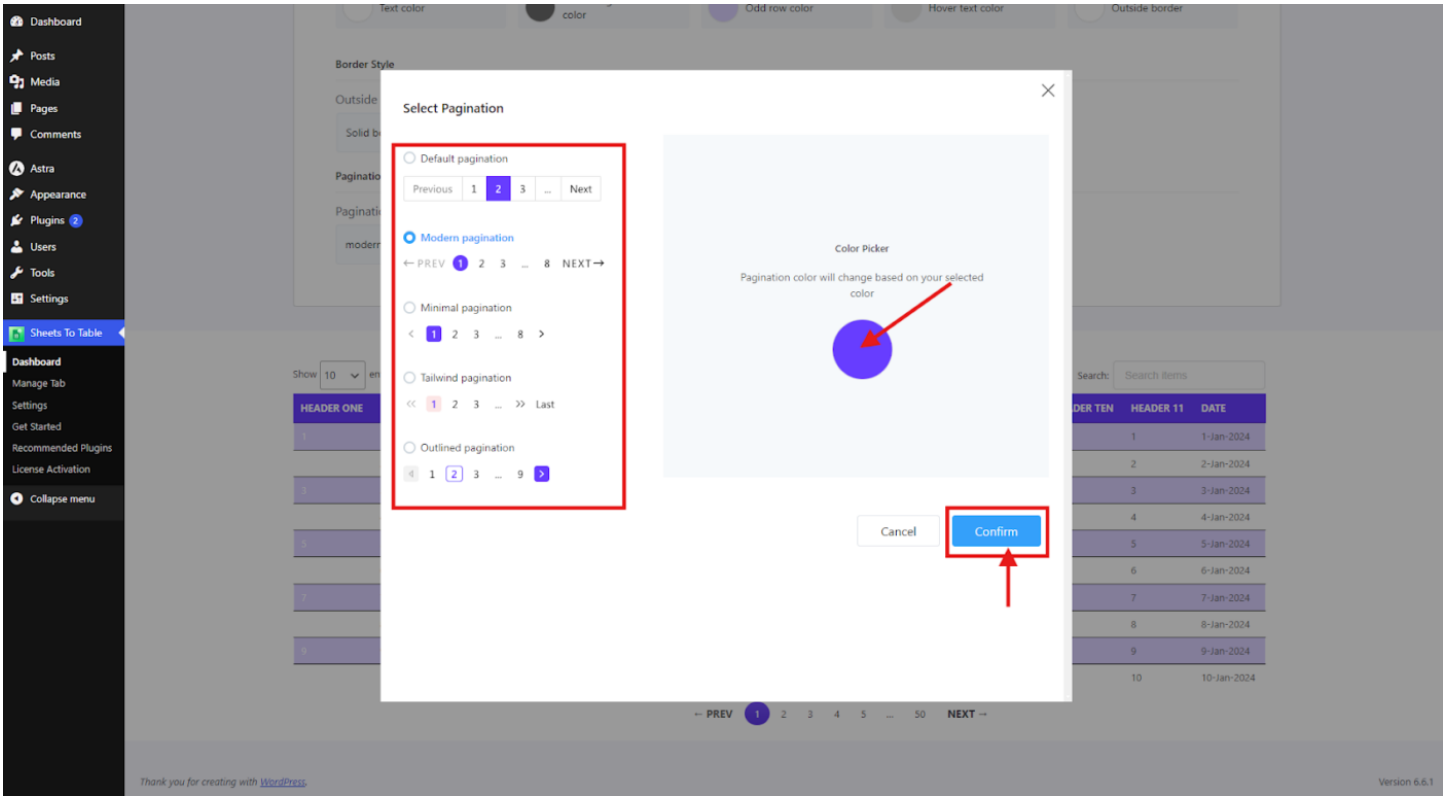
Choose from available styles such as **Default**, **Modern**, **Minimal, etc.** Set a color for the pagination, and click on **Create** to apply your new theme.



If you're already using a custom theme, you can easily adjust the pagination style and color. Simply click on the **Pagination Style** option.



A popup modal will appear where you can select your preferred style and color. After making your adjustments, remember to click **Fetch & Save** to apply your changes to the table.



Finally, visit the page where your table is embedded to see the updated pagination styling in action.
