How to Add a Jitsi Meeting in MarketKing Multivendor Marketplace

FlexMeeting - Webinar and Video Conference with Jitsi Meet · https://wppool.dev/docs/how-to-add-a-jitsi-meeting-in-marketking-multivendor-marketplace/

These step-by-step instructions explain how vendors can create a **Jitsi meeting** and add it as a **product for sale** inside **MarketKing — Ultimate WooCommerce Multivendor Marketplace Solution** using the Multivendor Addon included in Jitsi Meet Ultimate.

You can use this feature to sell:

- webinars
- online classes
- consultations
- coaching sessions
- private meetings

Before You Start

Please make sure the following plugins are already installed and active on your website:

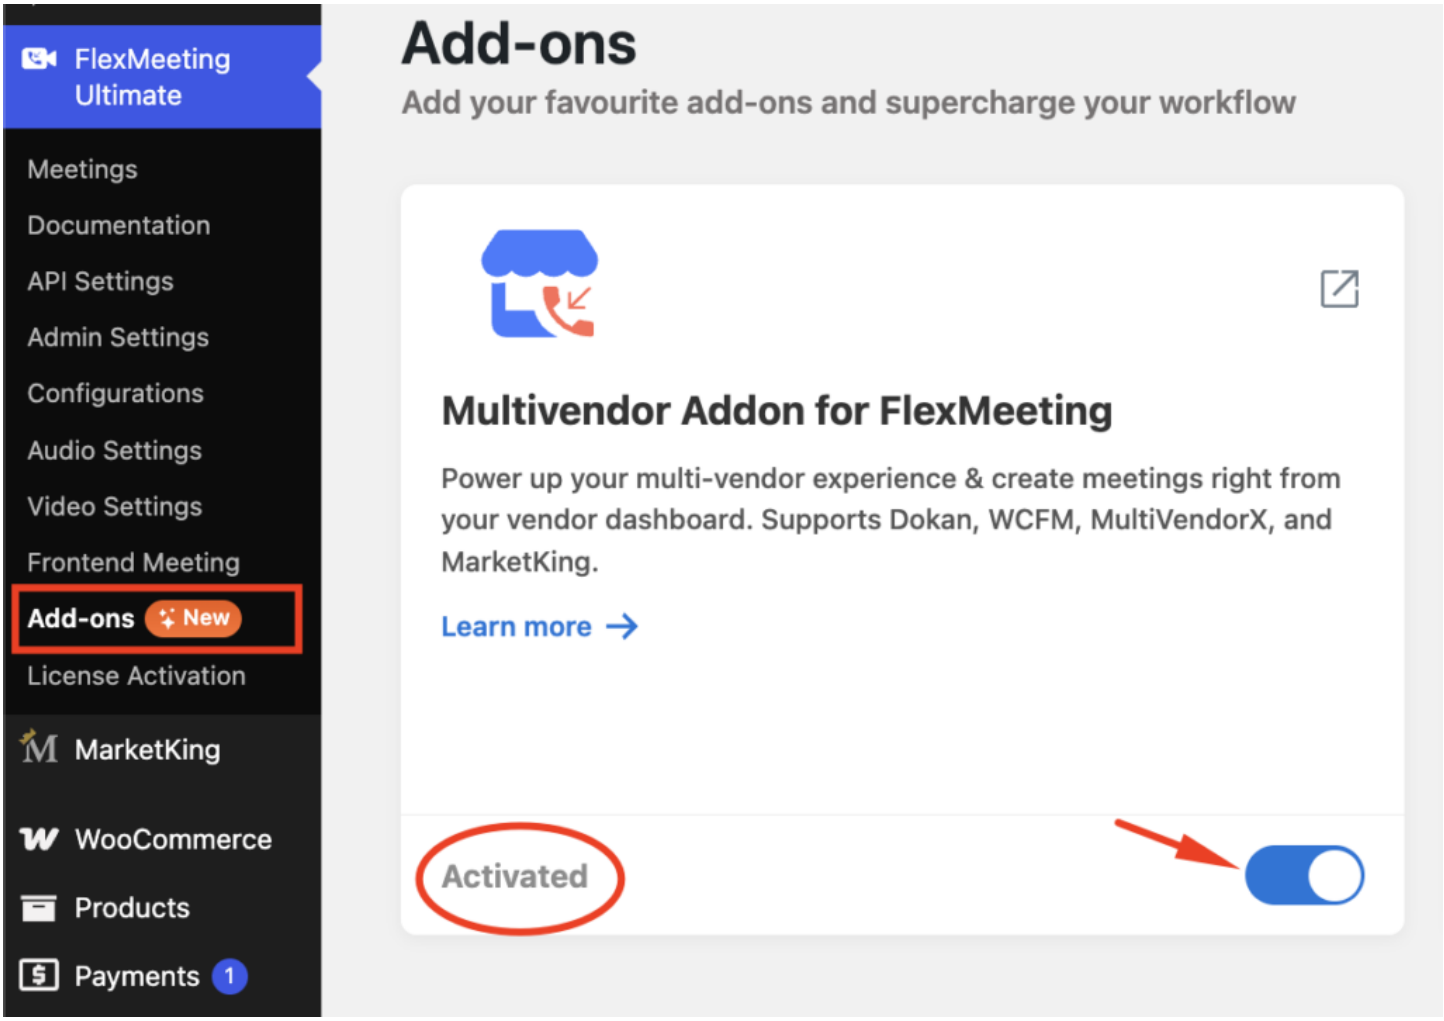
- WooCommerce
- Jitsi Meet **Multivendor Addon** (included in the Ultimate package)
- MarketKing — Ultimate WooCommerce Multivendor Marketplace Solution

> The Multivendor Addon is required for vendors to create and sell meetings.

Step 1: Install the Multivendor Addon

First, activate the Multivendor Addon.

1. Go to your **WordPress Dashboard**
2. Open **Jitsi Meet Ultimate**
3. Click **Add-ons**
4. Find **Multivendor Addon**
5. Click **Install** or **Activate**
6. If already active, make sure it is updated



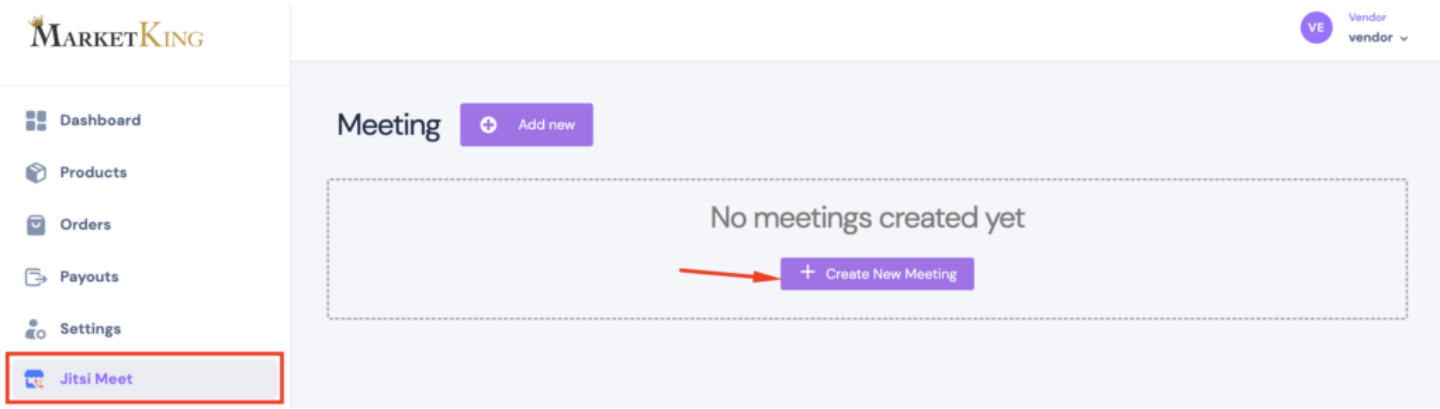
Once activated, vendors can create meetings from their dashboard.

Step 2: Open the Vendor Dashboard

Next, log in as a vendor.

1. Go to your **MarketKing Vendor Dashboard**

2. Click **Create New Meeting**

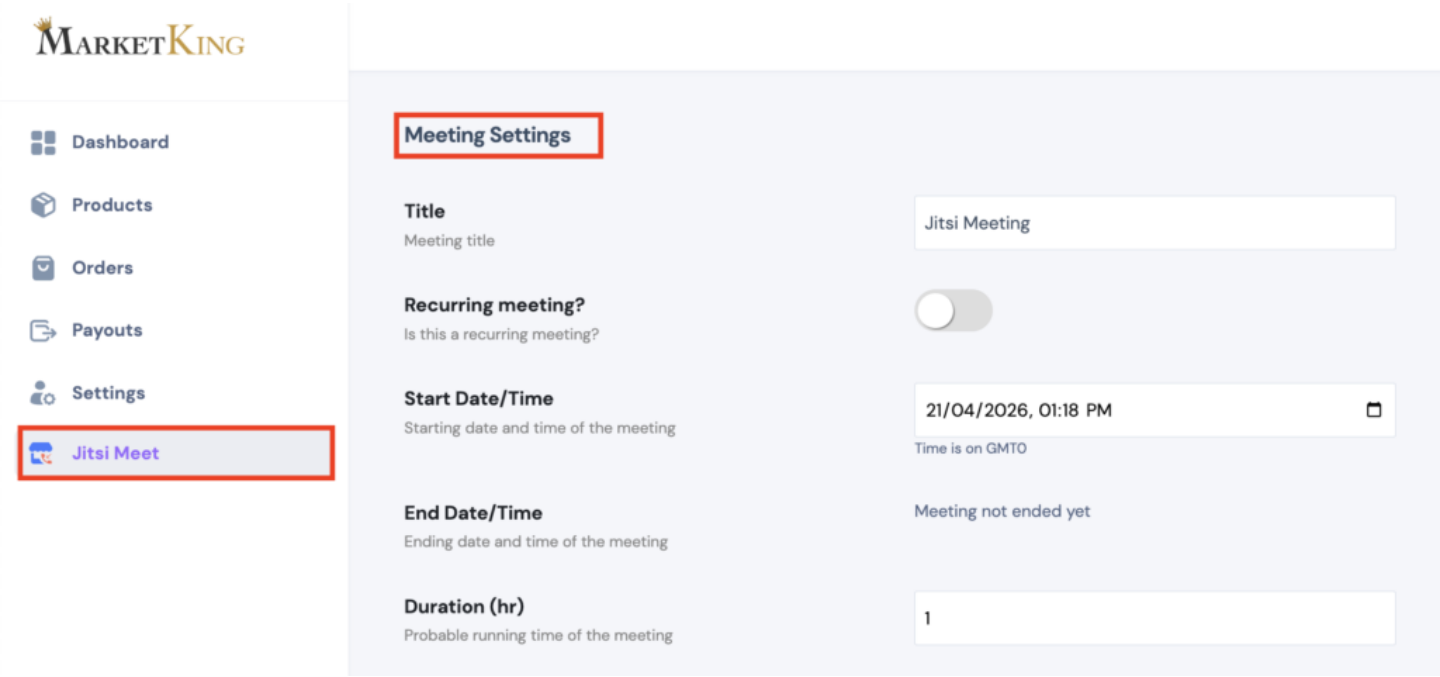


This will open the meeting setup page.

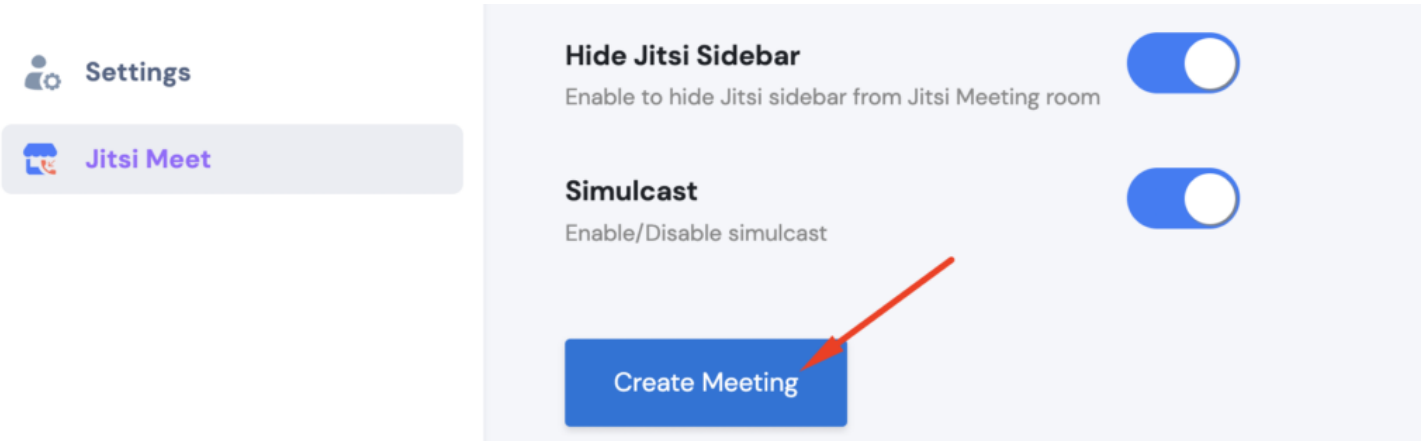
Step 3: Create Your Meeting

On the meeting setup page:

1. Enter the **meeting title**
2. Add a short **description**
3. Select the **date and time**
4. Choose your preferred meeting settings



After completing the details, click **Create Meeting**



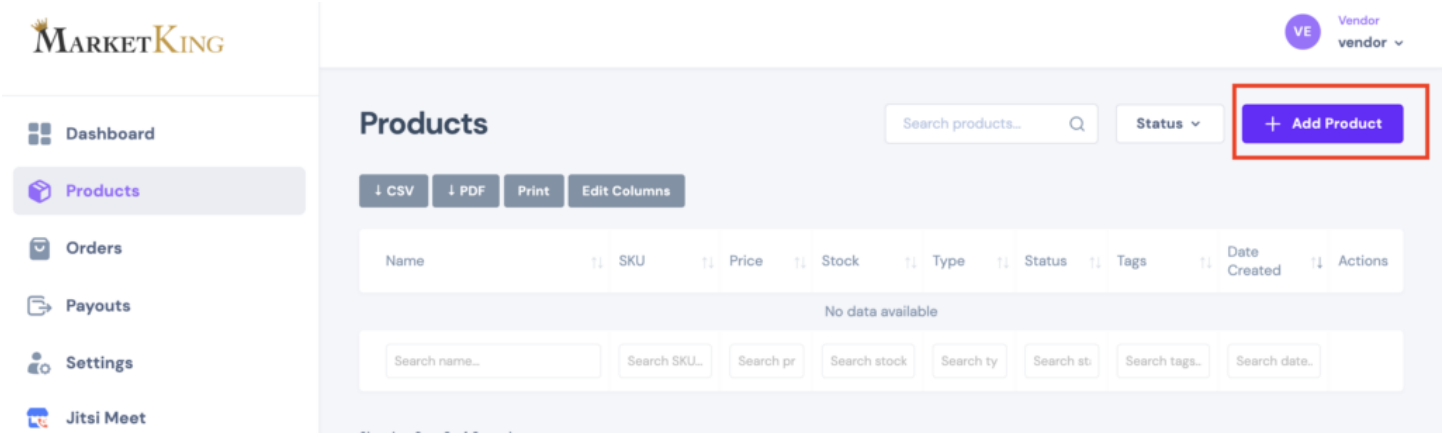
Your meeting has now been created and is ready to be linked to a product.

Step 4: Add the Meeting as a Product

To allow customers to purchase access to the meeting, you need to connect it to a product.

Follow these steps:

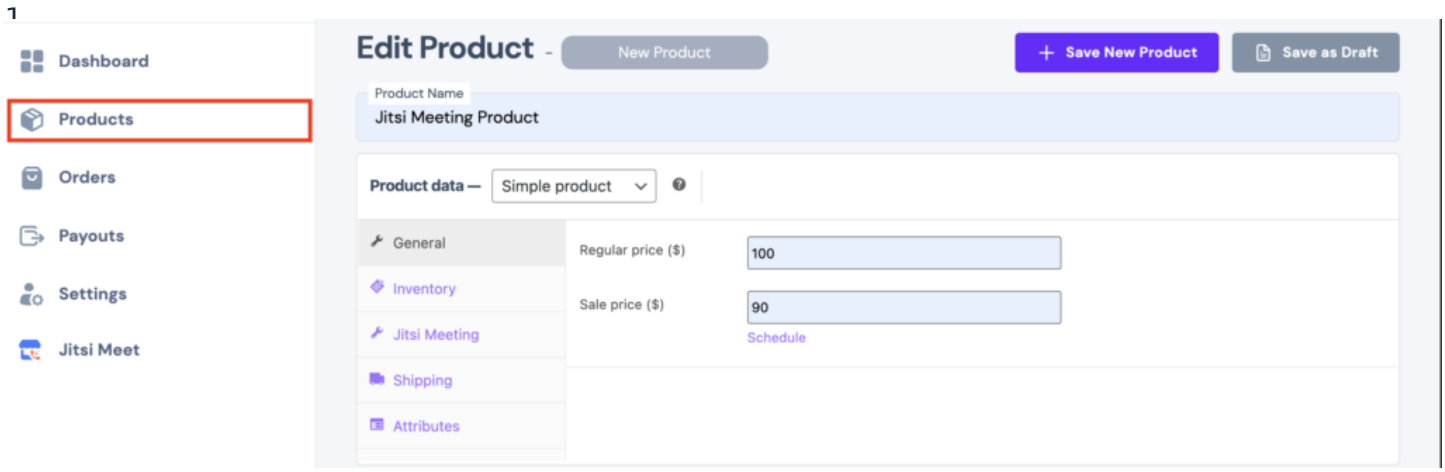
1. Go to **Products** in your Vendor Dashboard
2. Click **Add Product**



Enter:

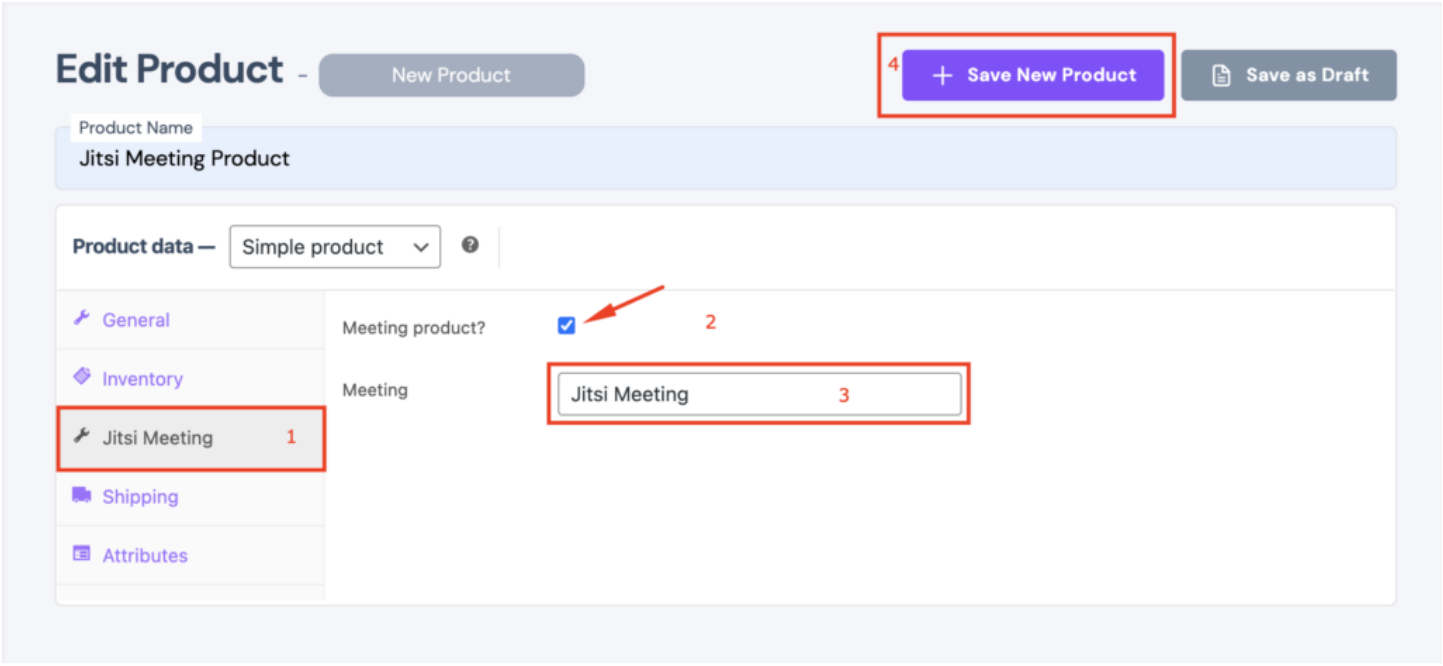
- product title
- price
- description

- Choose your preferred meeting settings

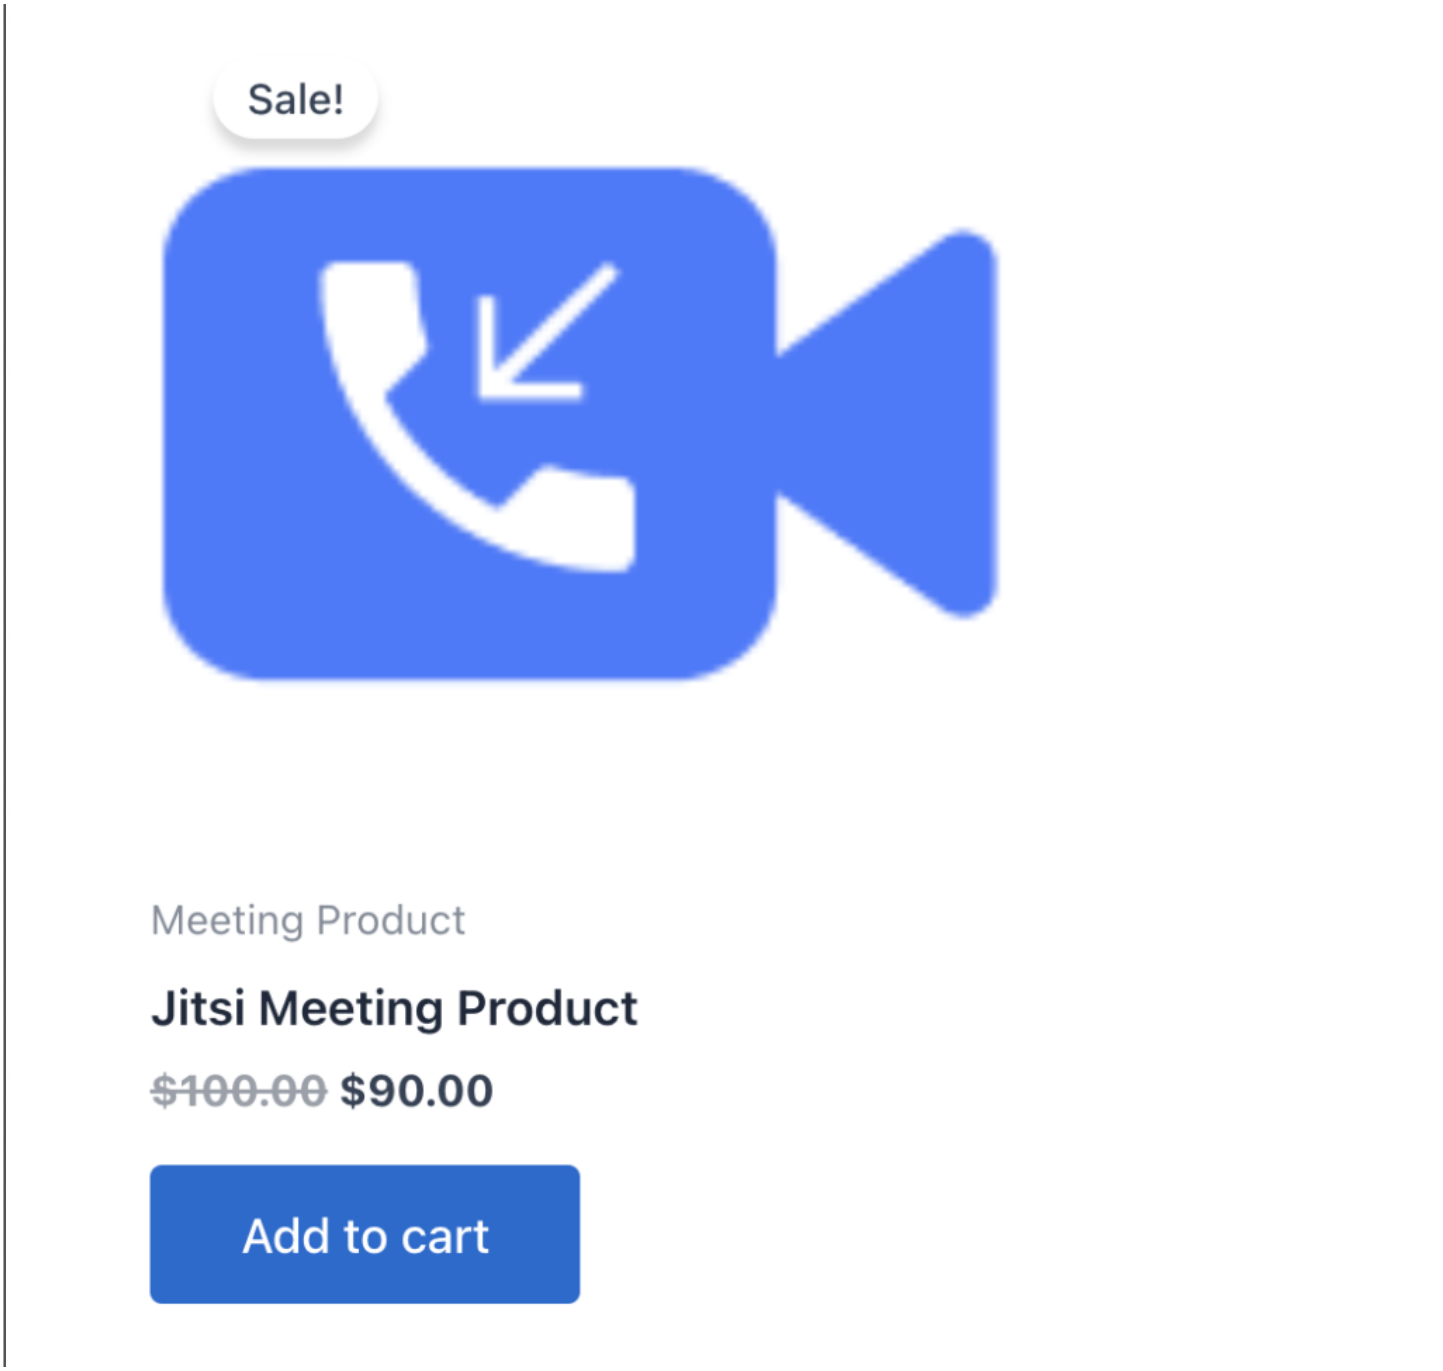


Next:

4. Open the **Jitsi Meeting** tab
5. Tick the “Meeting product?” checkbox to mark this product as a meeting.
6. Select your meeting from the **Meeting dropdown list**
7. Adjust any additional product settings if needed
8. Click **Save New Product**



Your meeting is now available for customers to purchase.



What Happens After This

- Your meeting becomes a product in your store
- Customers can purchase access
- You can manage the meeting from your dashboard
- The marketplace can support webinar-based services

This makes it easy to sell live sessions directly through your vendor store.
