How to add Meeting in LearnDash LMS with Jitsi Meet

FlexMeeting - Webinar and Video Conference with Jitsi Meet · https://wppool.dev/docs/how-to-add-a-meeting-in-learndash-lms/

Please ensure **LearnDash** is installed first to integrate with **Jitsi Meet**.

Go to your **WordPress dashboard** and click on the menu item “**Jitsi Meet Ultimate**”. Navigate to the “**Meetings**” tab and create a new meeting by clicking on “**Add New**” on top.

The new meeting will generate a **shortcode** that you can use on your course.

Next, navigate to **LearnDash** > **Courses** > **Add New**.

After setting up all course materials, you can paste the **shortcode** anywhere in the content section and also in lessons.

After that, **publish/update** the page and view the course.
