How to Display Products in Separate Rows in FlexOrder

FlexOrder - Order Sync with Google Sheets for WooCommerce · https://wppool.dev/docs/how-to-display-products-in-separate-rows-in-flexorder/

To enjoy this feature, you will need to activate **FlexOrder** - **Order Sync with Google Sheets** for the **WooCommerce** **Ultimate version**. Activate the version first if you haven't done so yet.

Enable Separate Rows for Multiple Products

- Navigate to **FlexOrder > Settings**.
- Enable the **Use separate rows to show multiple products of an order** toggle.
- Click **Save Changes**.

If an order contains multiple products, they will be recorded separately.

After enabling this feature it will appear in **separate rows** in your connected Google Sheets.

Notes:
When the **"Order Separation (Multiple Products of an Order)"** option is enabled, each order is displayed in a more detailed, item-based format.

Instead of showing all products under a single row (For Single Product Order), the system **splits the order into multiple entries**:

- One row for the **parent order**.
- Additional rows for each **individual product/item**

For example, if an order includes **Product 1** and **Product 2**, they will appear as **separate entries with different serial numbers**, rather than being grouped under one order row.

	A	B	C	D	
1	Order ID	Product Names	Order Status	Total Items	Product SKU
2	1467	Wooden Vases (qty: 1,price: 30) [1 Products]	wc-processing	1	** No SKU Found **
