How to get started with Revio (Onboarding steps)

Revio · https://wppool.dev/docs/how-to-get-started-with-revio-onboarding-steps/

Installing the Free version

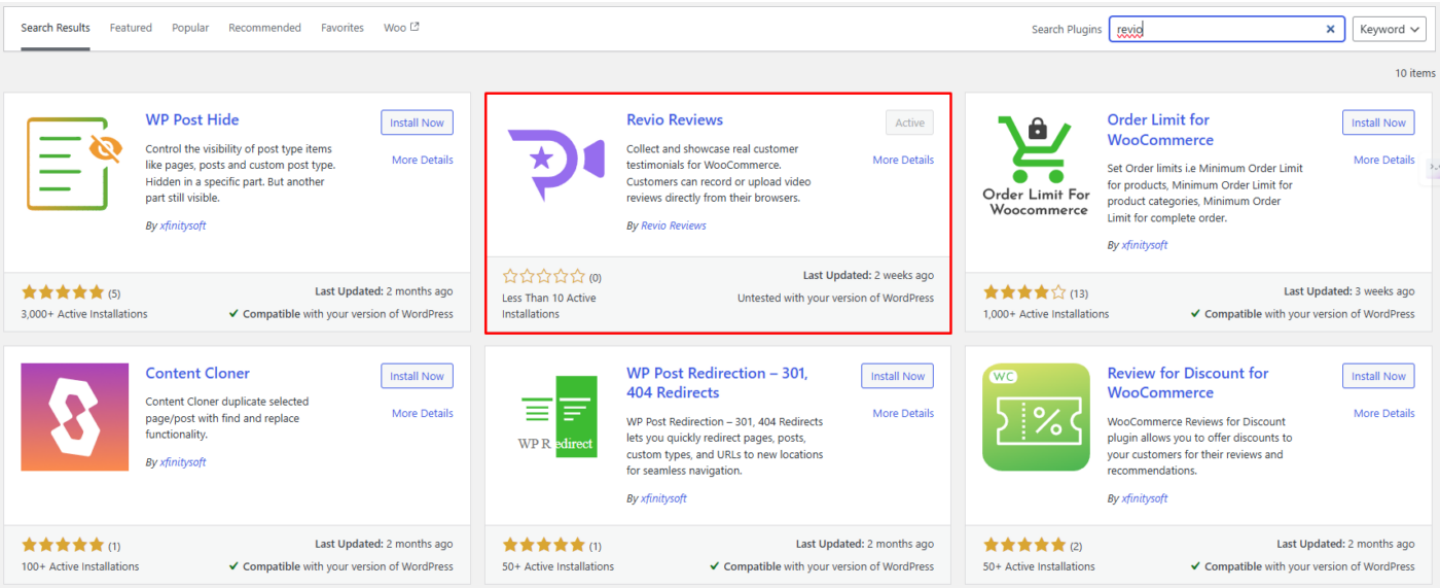
The free version of Revios is available on the WordPress plugin repository. You can install it in two ways:

The easy way:

Go to your WordPress Dashboard.

Navigate to **Plugins > Add New Plugin** and type in “**Revio**” in the search field.

Find Revios in the list and click on “Install Now“.



Once the installation is complete, activate the plugin to get started with your testimonial journey.

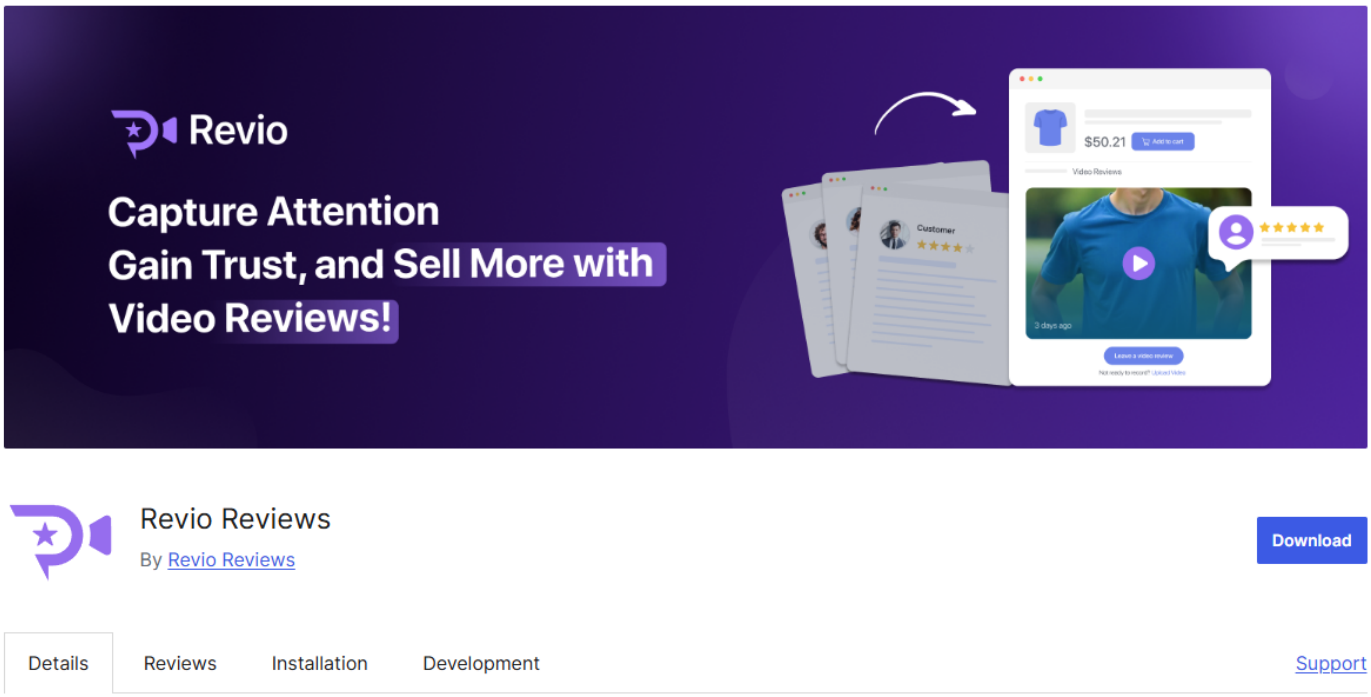
The classic way:

Go to our plugin directory on WordPress.org.

Download the ZIP file containing the latest version of our plugin.

Navigate to **WordPress Dashboard > Plugins > Add New Plugin** and click on **Upload Plugin** at the top left corner of your screen.

Select the downloaded file to install the plugin.



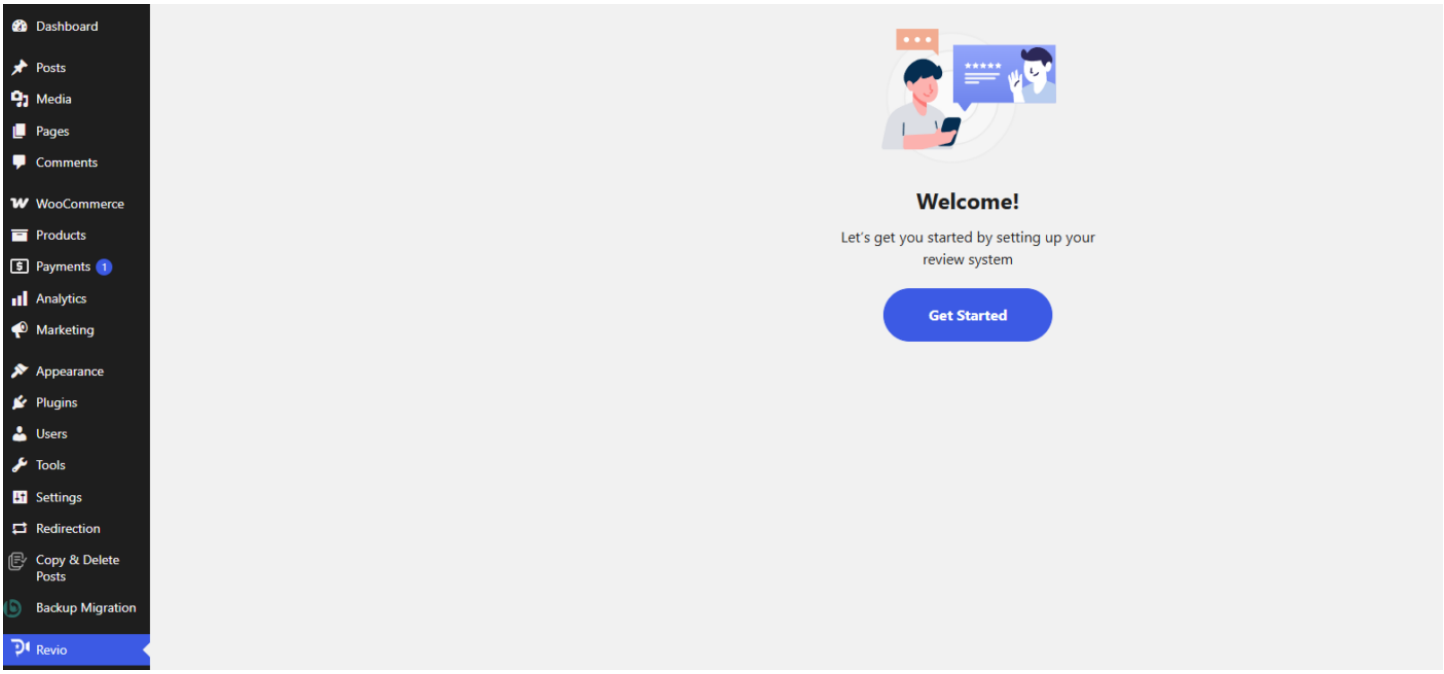
Installing the Premium version

To activate the Premium versions of Revios, you will not need to download another plugin. Once you upgrade to one of our paid plans, your subscription will be updated automatically.

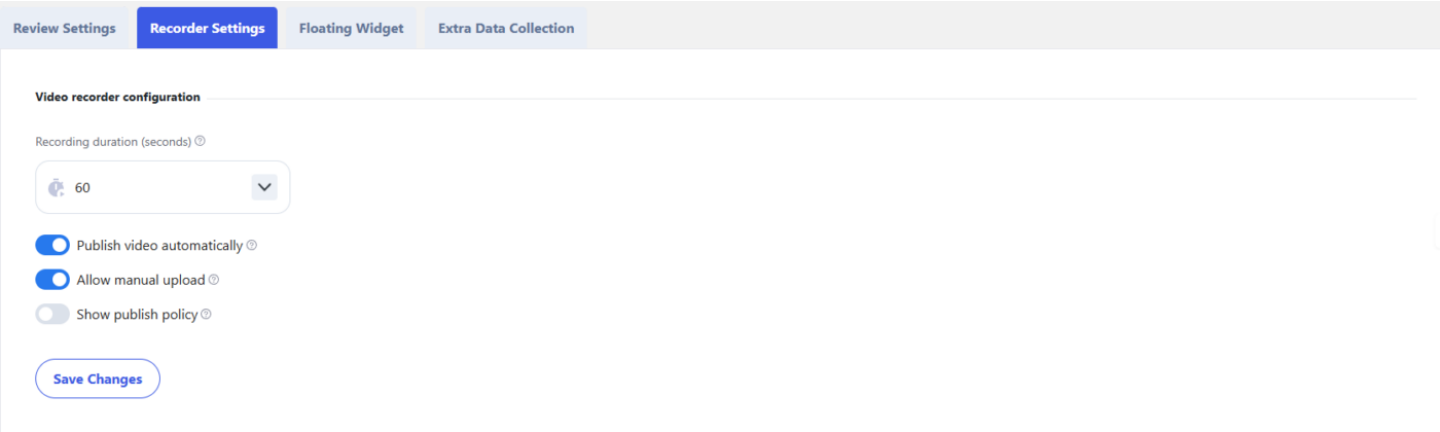
You can always check your subscription status by navigating to your **WordPress Dashboard > Revio > Profile & Plan.**

Onboarding steps

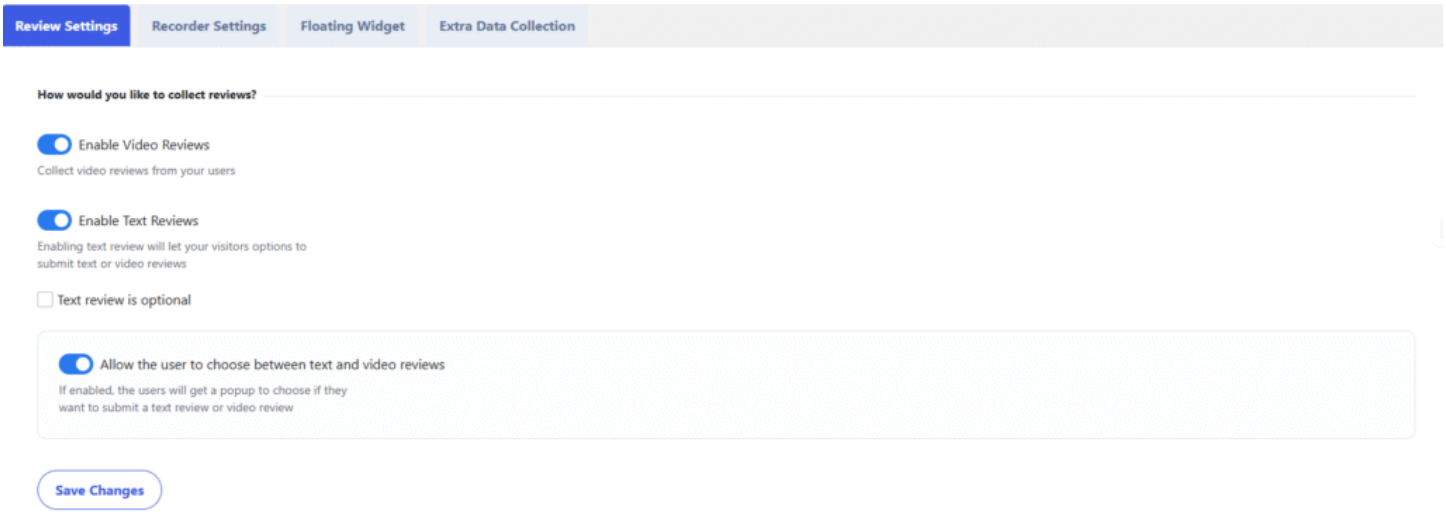
Once you activate Revios, you'll be redirected to the onboarding page. Click on **Get Started** to begin the initial setup.



In step 1 of the setup, you can configure the video recorder settings (recording duration, publishing, and manual upload settings).



In the next step, you can enable text reviews. Activating this option will provide the flexibility to your customers to leave text reviews alongside video reviews.



That’s it! You’re now ready to showcase authentic reviews on any page on your website and increase conversions.

You can customize the recorder and other settings at any time by navigating to **Revio > Settings** from your Dashboard.
