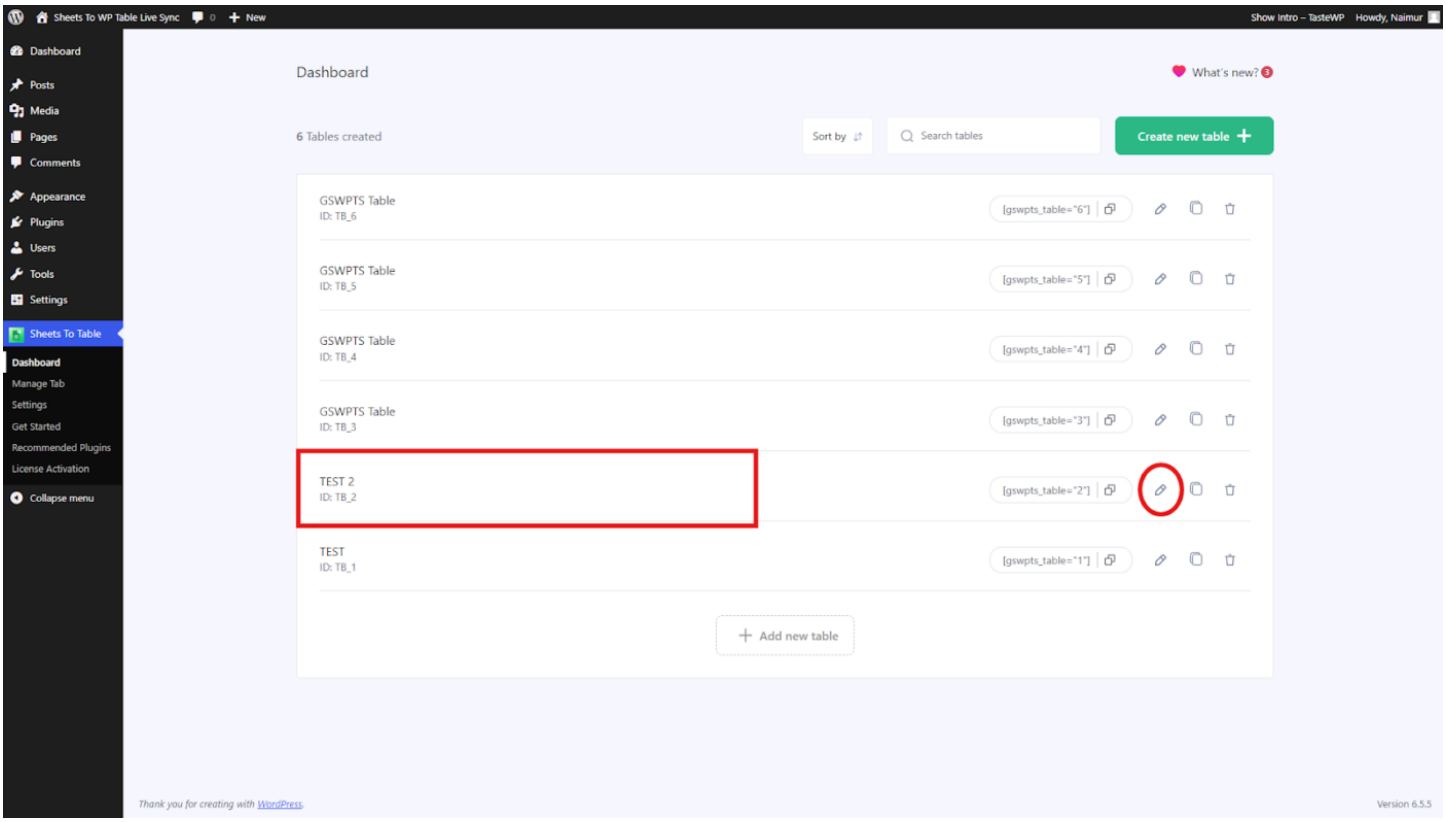
How to hide table rows and columns of Google Sheets table

FlexTable - Sheets to WP Table Live Sync · https://wppool.dev/docs/how-to-hide-table-rows-and-columns-of-google-sheets-table/

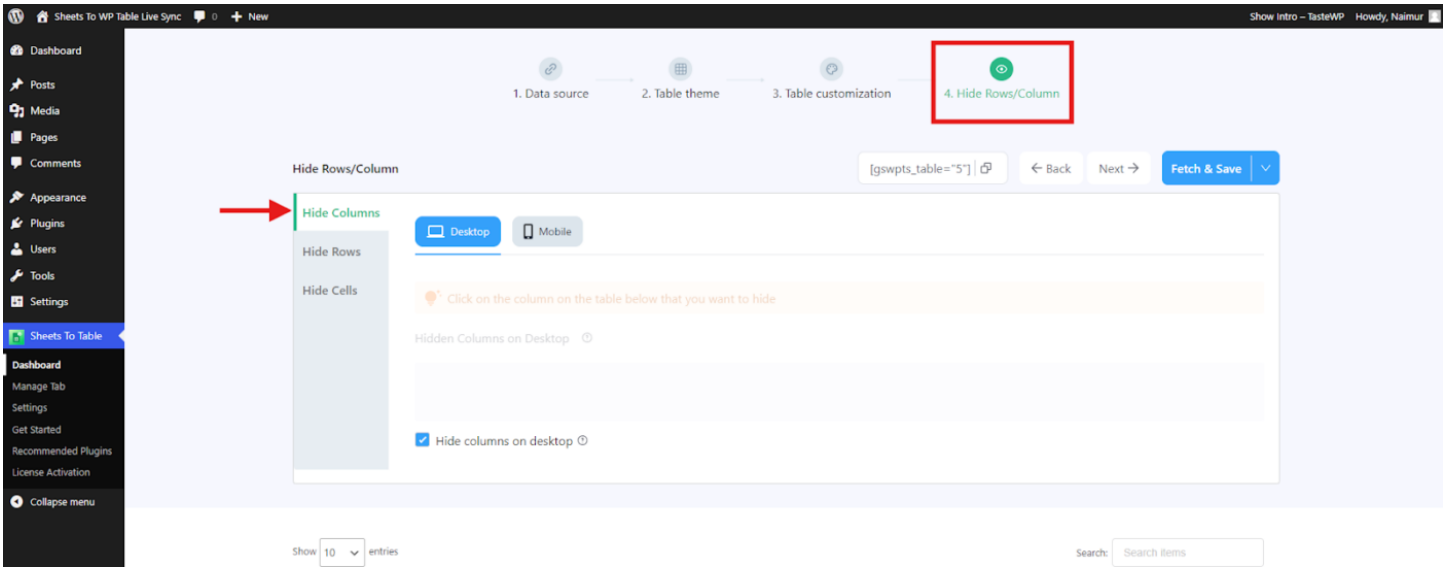
First, go to the plugin's **Dashboard**. Then click on the edit icon on the right side of the table you want to edit.



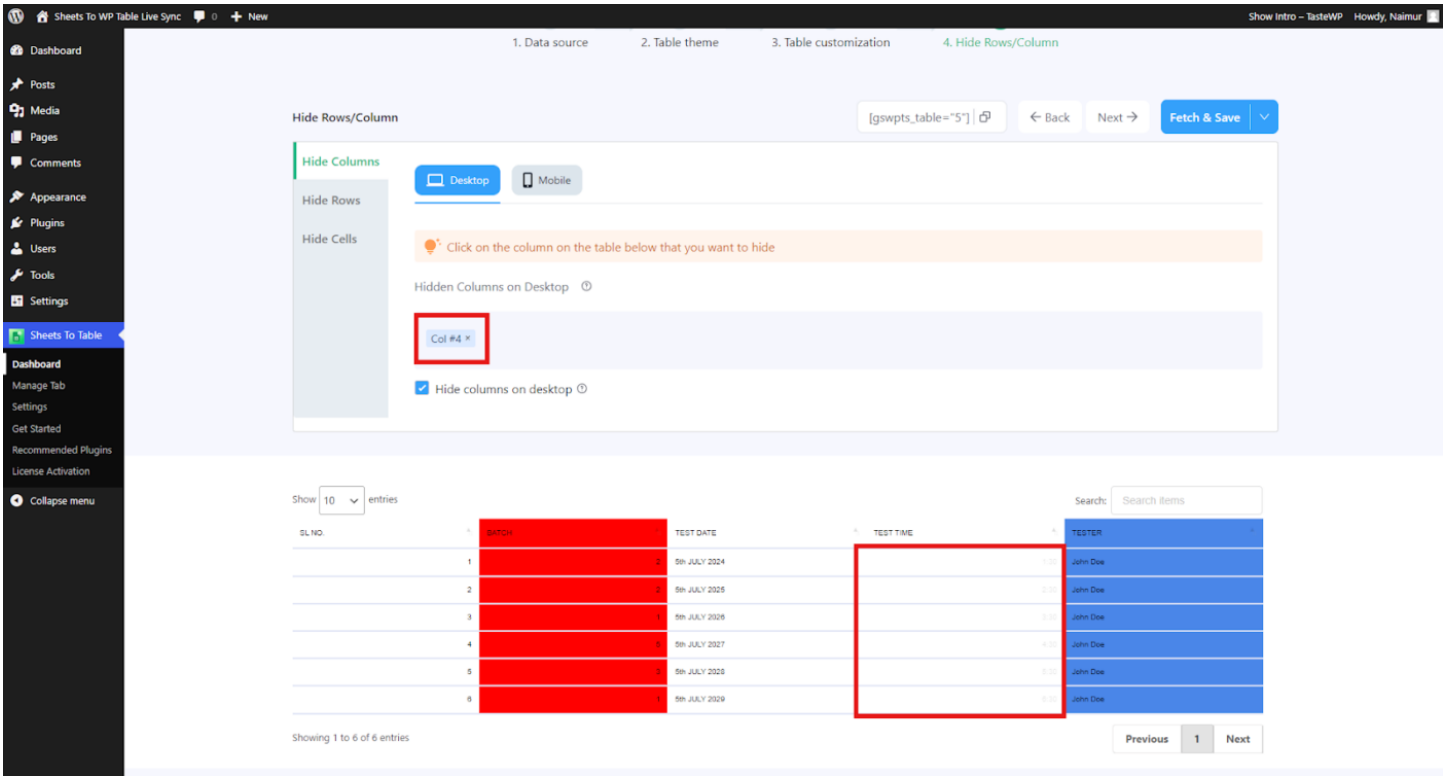
Then go to the **Hide Rows/Column** option from the Table Settings.

Hiding Columns

Go to the **Hide Column** option under the **Hide Rows/Column** Settings.



Now click on the column you want to hide from the table shown on the dashboard. After the column is selected it will be shown in the **Hidden Columns** box on the settings.

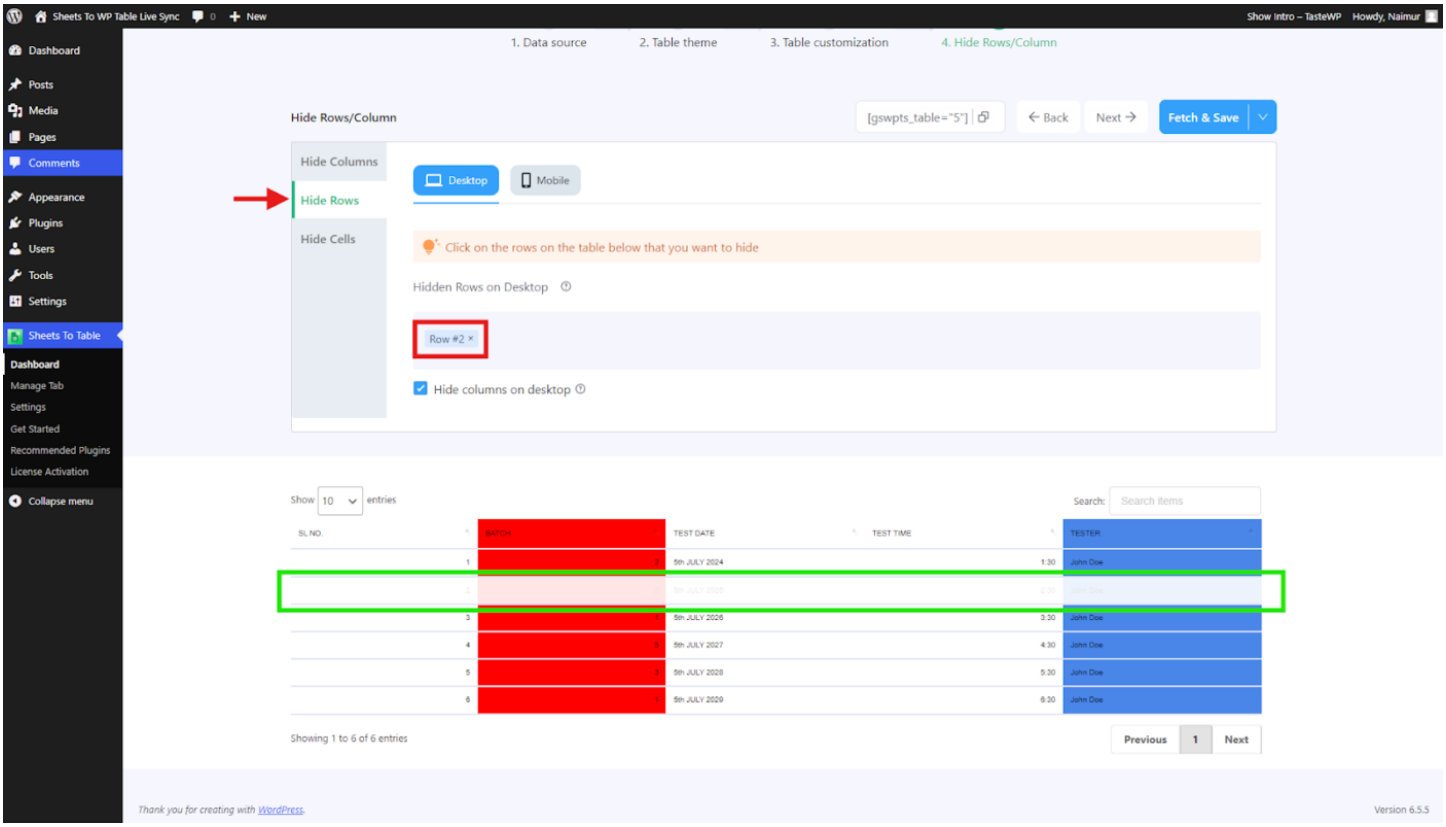


Then click on **Save** to finalize the procedure.

Hiding Rows

Go to the **Hide Rows** option under the **Hide Rows/Column** from the Table Settings as before.

Now click on the row you want to hide from the table shown on the dashboard. After the column is selected it will be shown in the **Hidden rows** box on the settings.



Then click on **Fetch & Save** to finalize the procedure. As simple as that.
