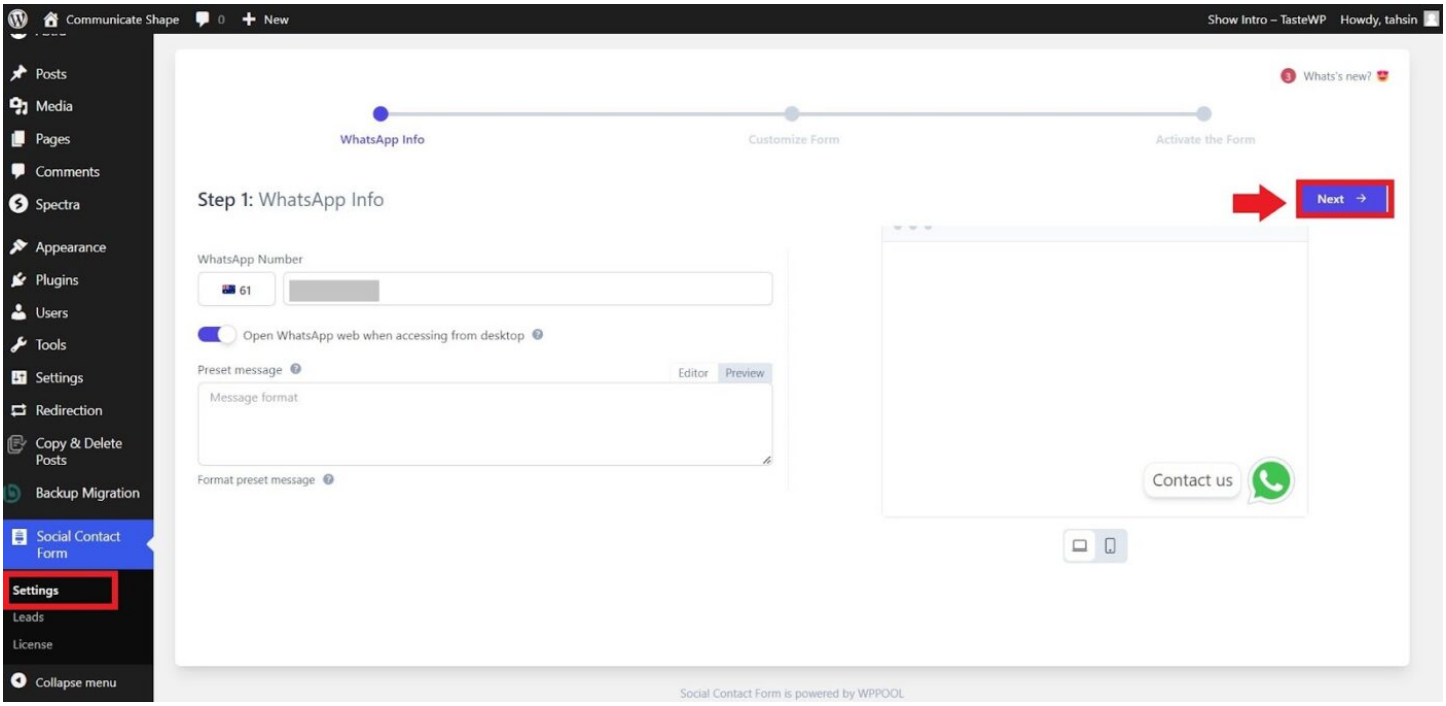
How to send contact form leads to email

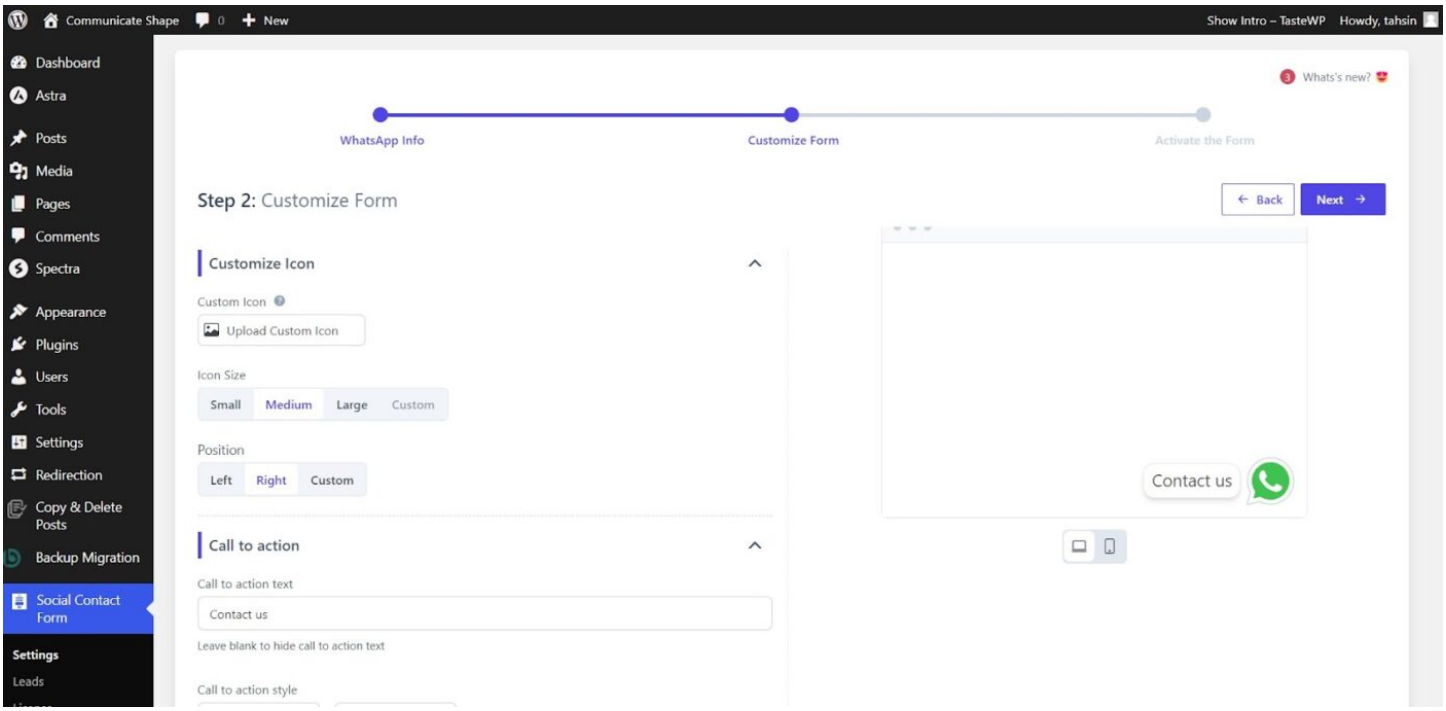
FormyChat · https://wppool.dev/docs/how-to-send-contact-form-leads-to-email/

First, you will need to install and activate FormyChat Ultimate to enjoy the feature.

Now, go to “Settings” under FormyChat.

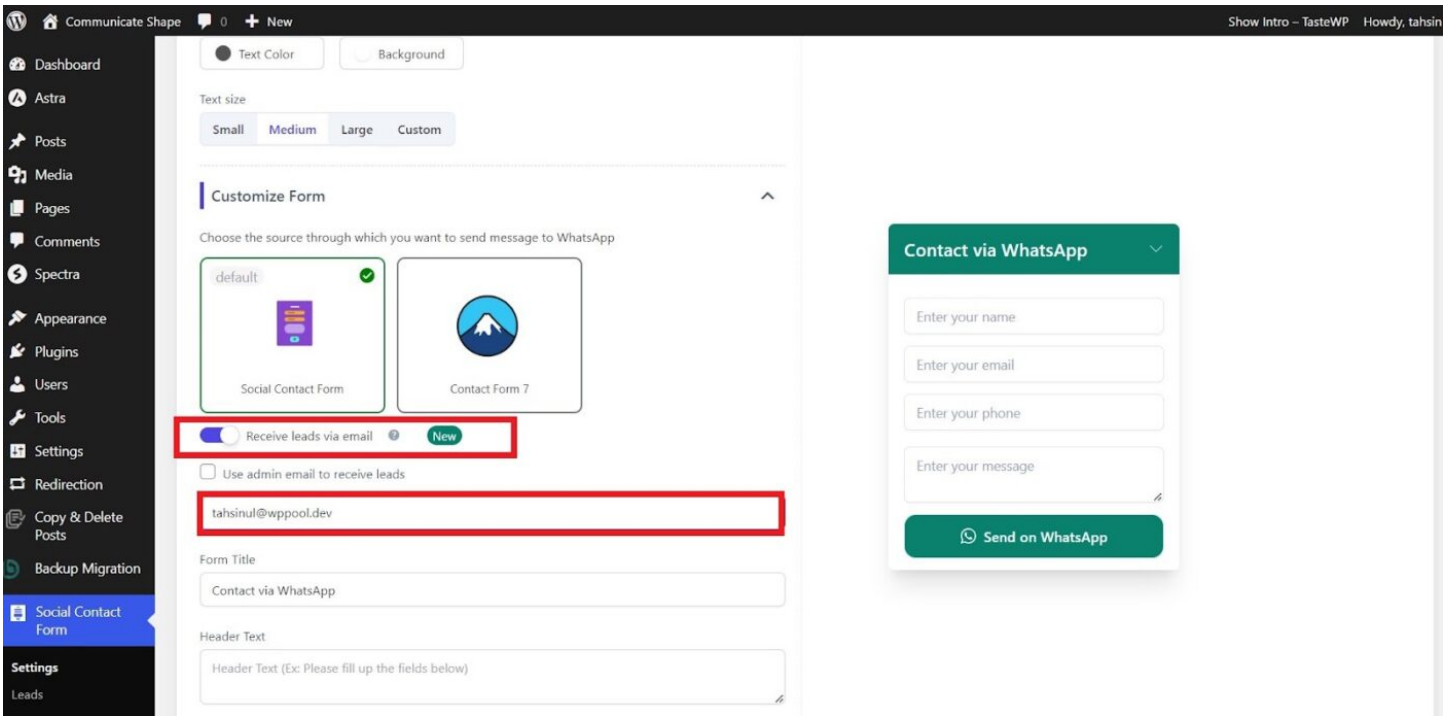


Enter the WhatsApp number you want to receive contact form leads and then hit “Next”.

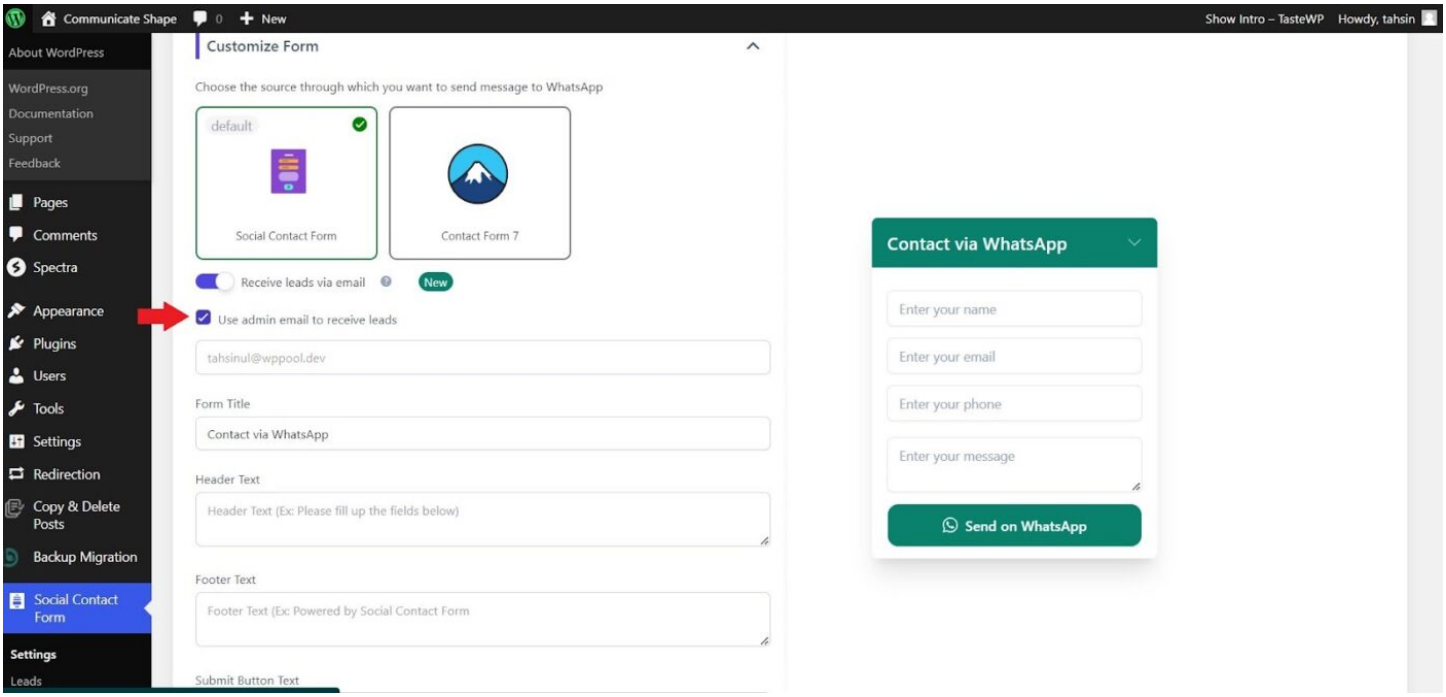


Then, on the **Customize Form** page, customize the form settings as you want. Scroll down and enable the “Recieve leads via email” feature to get the leads on your email account alongside WhatsApp chat.

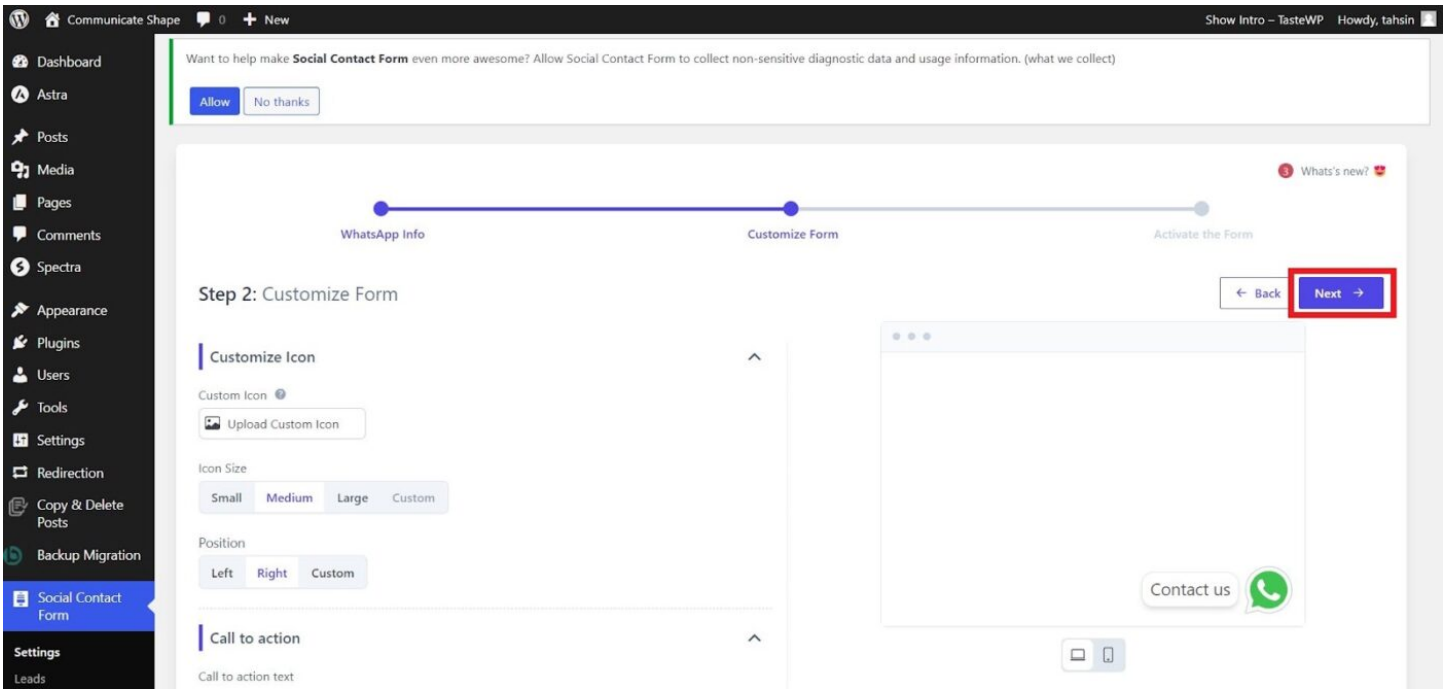
Type the email address where you want to get the leads.



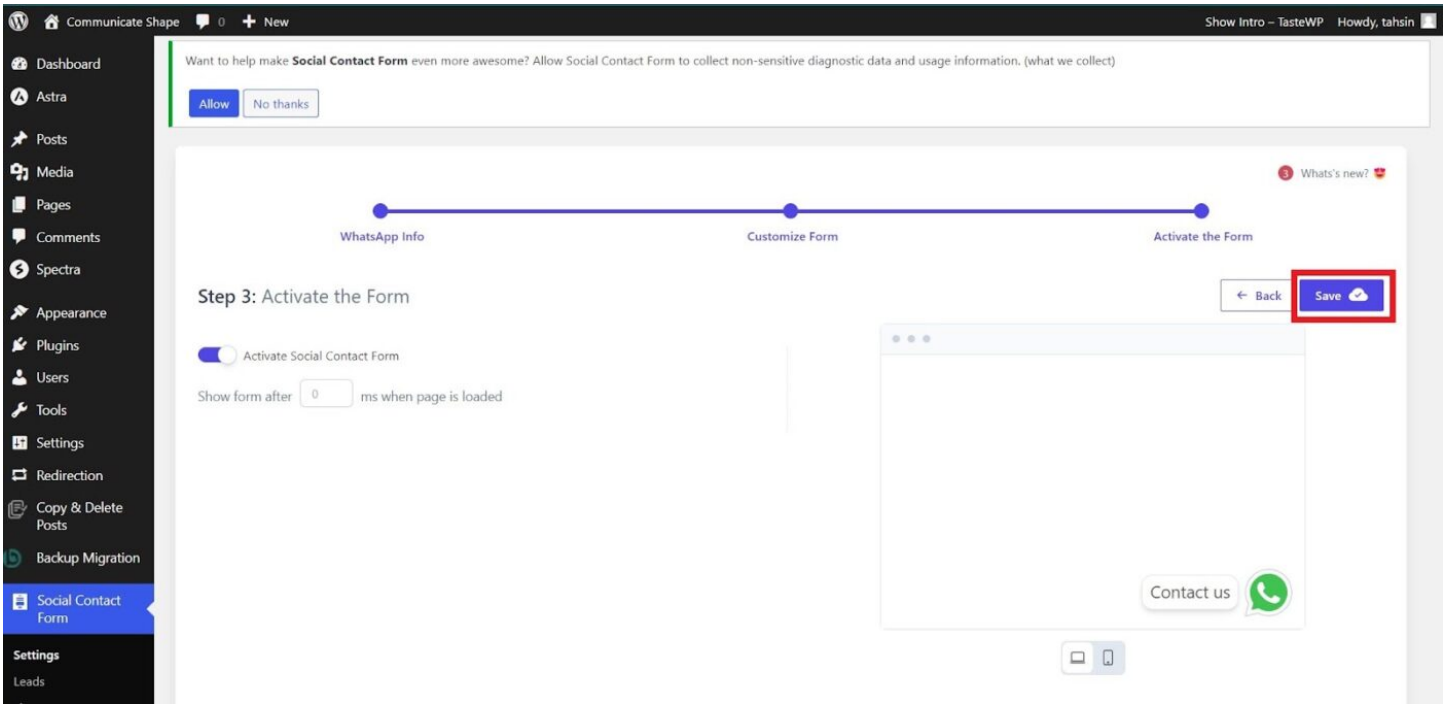
You can also use your admin email to receive the leads. In that case, just check the “Use admin email to receive leads” option..



Now click “Next” on the top of the page.



Finally, hit “Save” to save the changes.



Now you can enjoy getting your leads on your email.
