How to Sync & Update Product Badges with FlexStock

FlexStock - Stock Sync for WooCommerce with Google Sheet · https://wppool.dev/docs/how-to-sync-update-product-badges-with-flexstock/

With FlexStock Plugin for WooCommerce, you can sync and update product badges from Google Sheets. This feature currently works with the **YITH WooCommerce Badge Management Plugin**, so you must create your badges in that plugin first before syncing them with FlexStock.

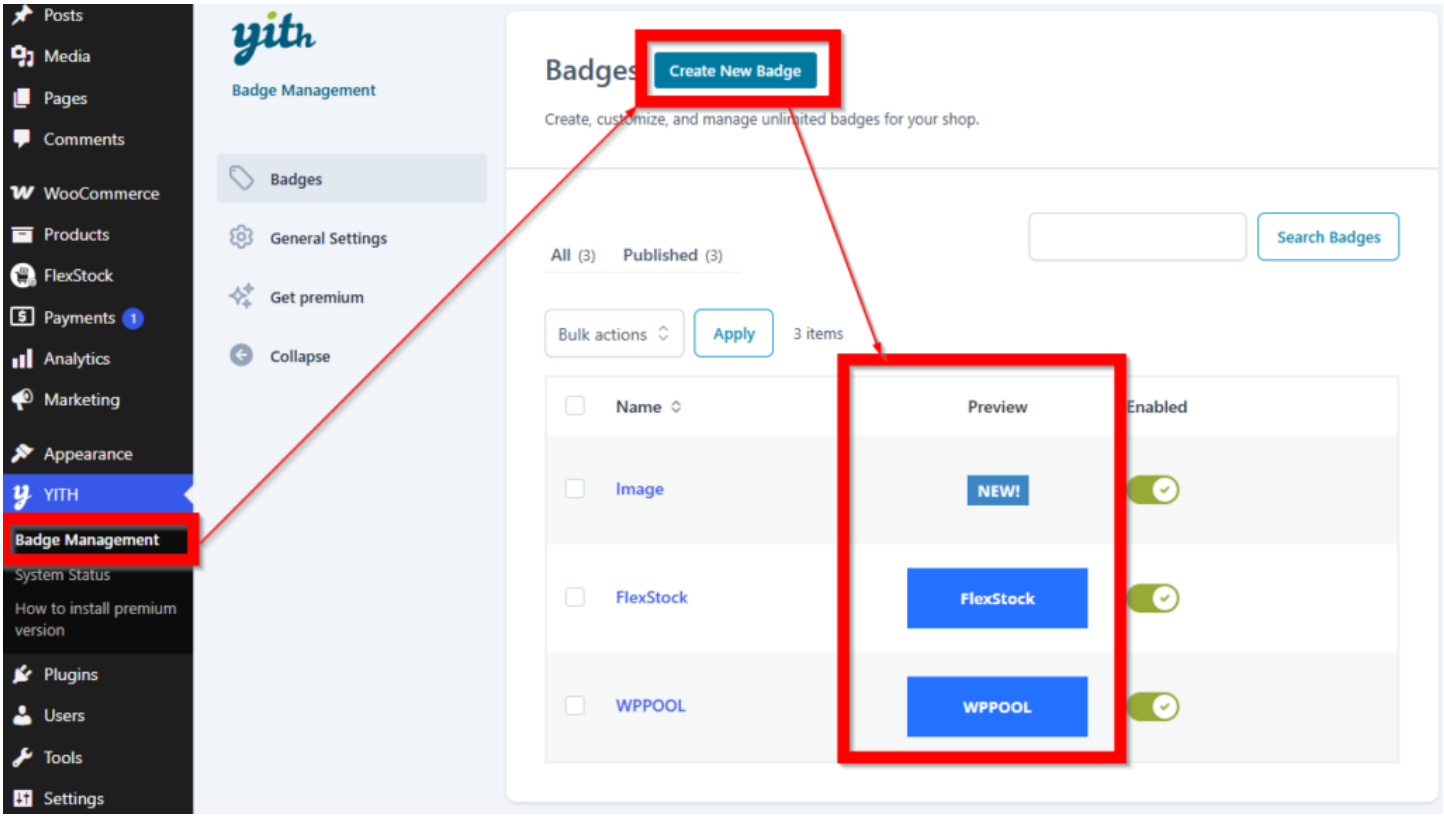
Follow this guide to set it up.

Step 1: Create Product Badges in YITH WooCommerce Badge Management

Before using FlexStock, you need to create the badges in the YITH WooCommerce Badge Management Plugin.

In your WordPress dashboard:

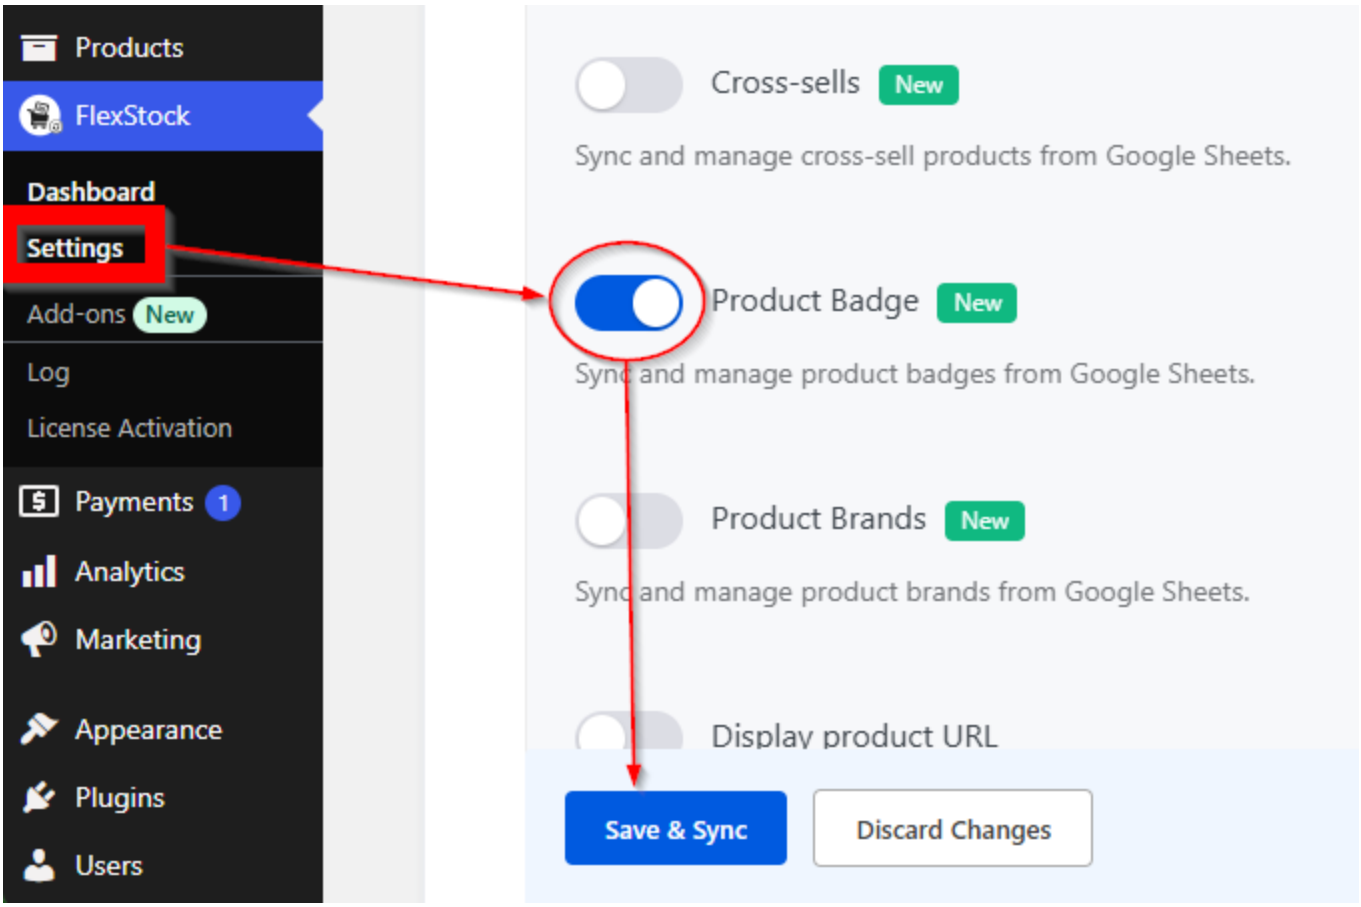
1. Open **YITH > Badge Management**
2. Create the badges you want to use
3. Save your badge settings



Step 2: Go to Your FlexStock Plugin Settings

Go to your FlexStock Plugin settings in the WordPress dashboard.

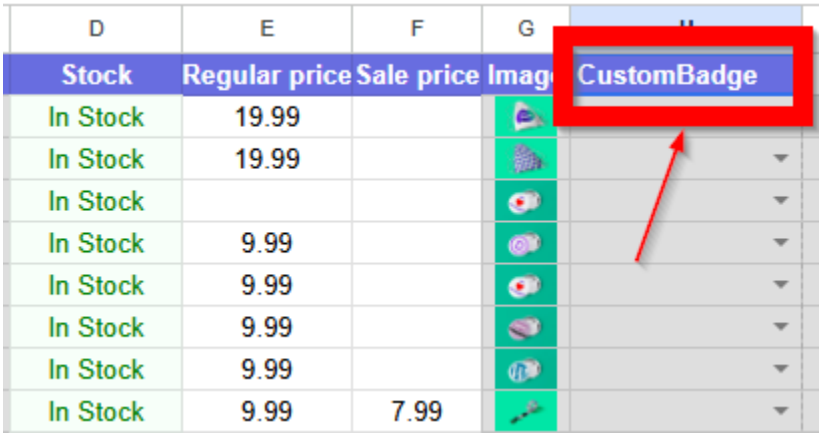
Enable the Product Badge column for your connected Google Sheet, then click Save & Sync.



Step 3: Open the Connected Google Sheet

Open the Google Sheet connected to your WooCommerce store through FlexStock.

Locate the badges column to use the exact column name provided by FlexStock.



Step 4: Enter the Badge Value for Each Product

In the badge column, choose the badge value for each product.

The value you already created in the YITH WooCommerce Badge Management Plugin. You can edit this with Google Sheets.

Example:

C	D	E	F	G	H
Name	Stock	Regular price	Sale price	Image	CustomBadge
Divi Engine String Bag (Big Logo)	In Stock	19.99			WPPOOL
Divi Engine String Bag (Small Logos)	In Stock	19.99			FlexStock
Brand Buttons	In Stock				
Brand Buttons - Divi	In Stock	9.99			
Brand Buttons - Divi Engine	In Stock	9.99			
Brand Buttons - WooCommerce	In Stock	9.99			
Brand Buttons - WordPress	In Stock	9.99			
Lanyard	In Stock	9.99	7.99		
Divi Engine Tee	In Stock				
Divi Engine Tee - Blue, Large	In Stock	14.99			
Divi Engine Tee - White, Large	In Stock	14.99			
Divi Engine Tee - Yellow, Large	In Stock	14.99			
Divi Engine Tee - Blue, Medium	In Stock	14.99			
Divi Engine Tee - White, Medium	In Stock	14.99			
Divi Engine Tee - Yellow, Medium	In Stock	14.99			
Divi Engine Tee - Blue, Small	In Stock	14.99			

Step 5: Save and Sync the Sheet

After choosing the badge values, save your changes in Google Sheets.

If your FlexStock setup syncs automatically, the badge updates will be sent to WooCommerce based on your sync schedule.

	A	B	C	D	E	F	G	H
1	ID	Type	Name	Stock	Regular price	Sale price	Image	CustomBadge
2	13	Simple	Divi Engine String Bag (Big Logo)	In Stock	19.99			WPPOOL
3	14	Simple	Divi Engine String Bag (Small Logos)	In Stock	19.99			FlexStock
4	15	Variable	Brand Buttons	In Stock				
5	16	Variation	Brand Buttons - Divi	In Stock	9.99			
6	17	Variation	Brand Buttons - Divi Engine	In Stock	9.99			
7	18	Variation	Brand Buttons - WooCommerce	In Stock	9.99			
8	19	Variation	Brand Buttons - WordPress	In Stock	9.99			
9	20	Simple	Lanyard	In Stock	9.99	7.99		
10	21	Variable	Divi Engine Tee	In Stock				
11	22	Variation	Divi Engine Tee - Blue, Large	In Stock	14.99			
12	23	Variation	Divi Engine Tee - White, Large	In Stock	14.99			
13	24	Variation	Divi Engine Tee - Yellow, Large	In Stock	14.99			
14	25	Variation	Divi Engine Tee - Blue, Medium	In Stock	14.99			
15	26	Variation	Divi Engine Tee - White, Medium	In Stock	14.99			
16	27	Variation	Divi Engine Tee - Yellow, Medium	In Stock	14.99			
17	28	Variation	Divi Engine Tee - Blue, Small	In Stock	14.99			
18	29	Variation	Divi Engine Tee - White, Small	In Stock	14.99			
19	30	Variation	Divi Engine Tee - Yellow, Small	In Stock	14.99			
20	31	Variable	Divi Tee	In Stock				
21	32	Variation	Divi Tee - Large	In Stock	14.99			
22	33	Variation	Divi Tee - Medium	In Stock	14.99			
23	34	Variation	Divi Tee - Small	In Stock	14.99			
24	35	Variable	WordPress Tee	In Stock				

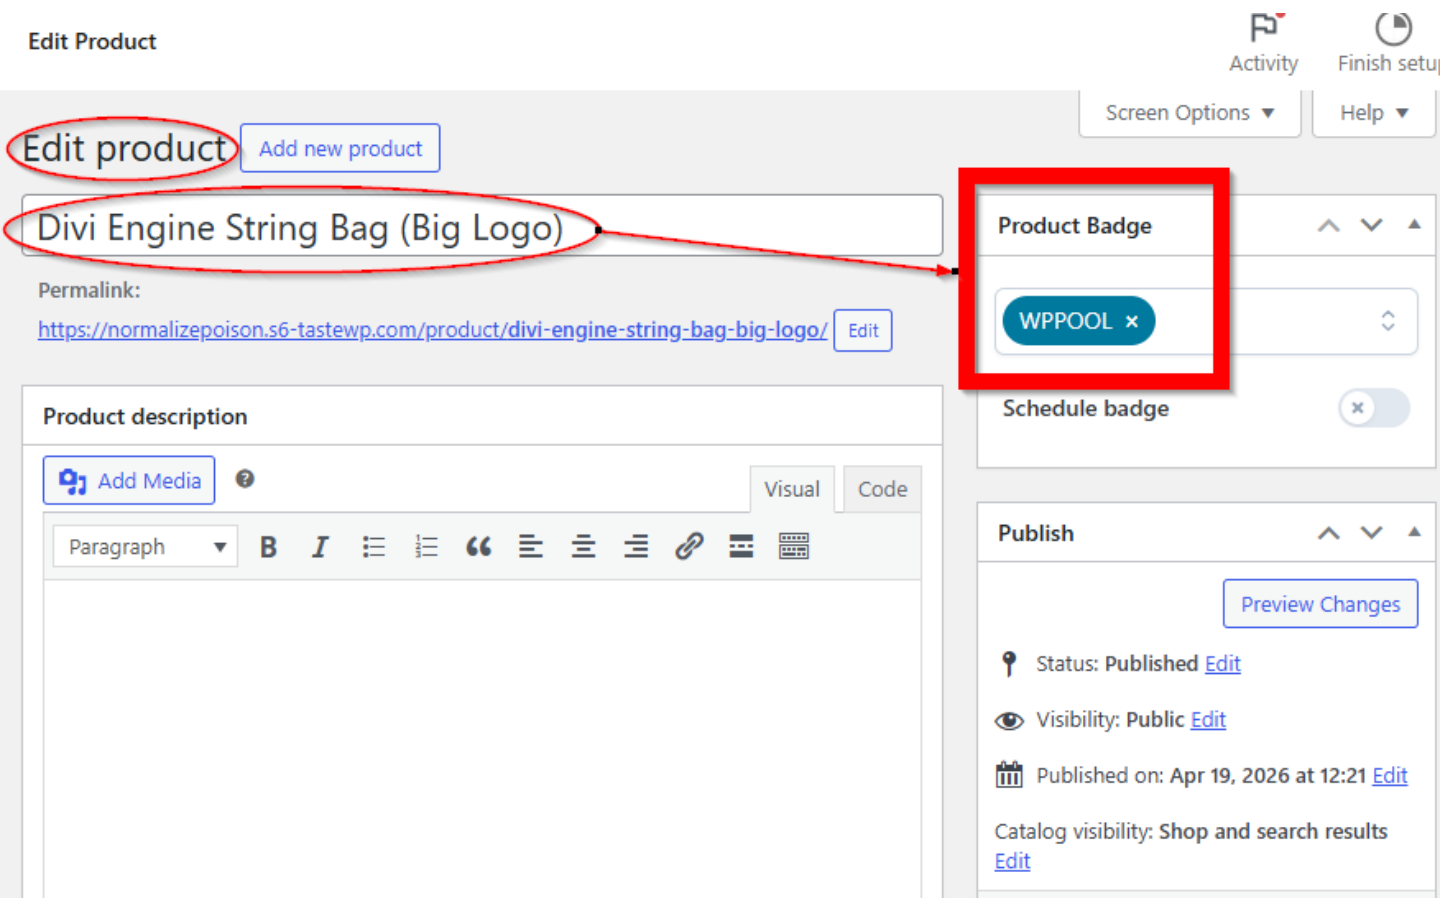
Step 6: Verify the Product Badge in WooCommerce

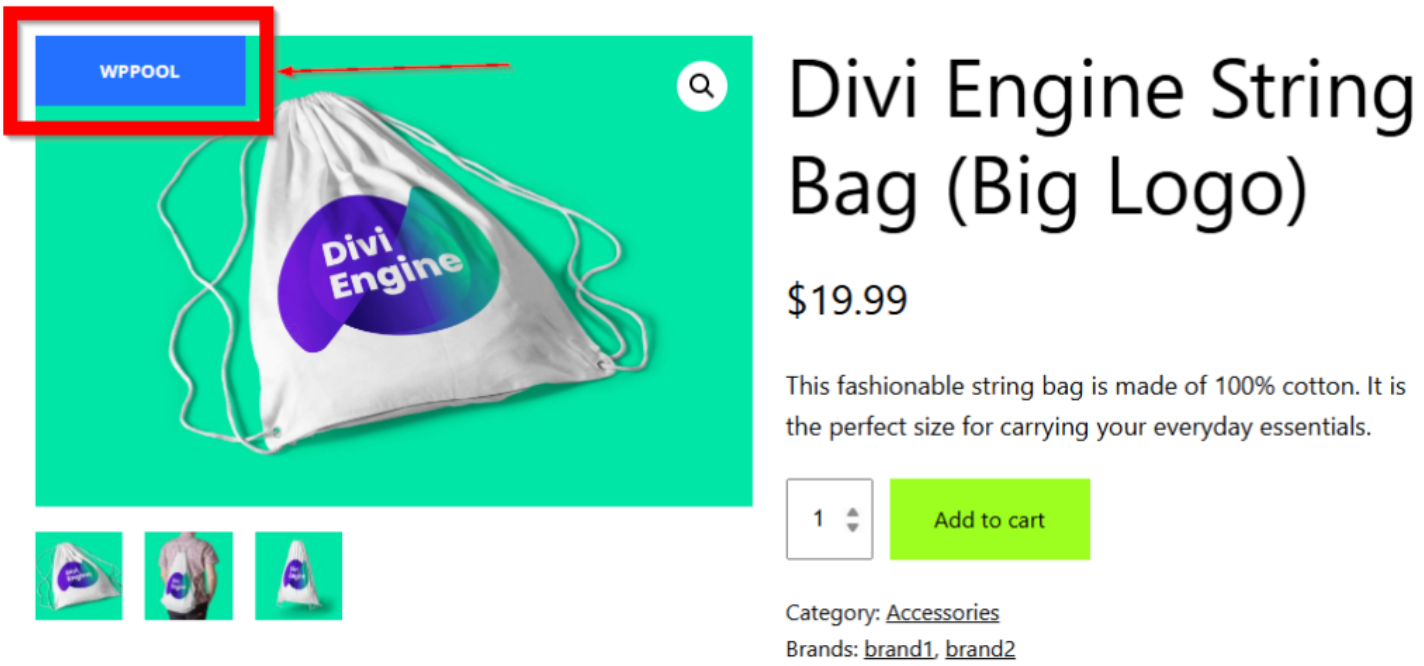
Once the sync is complete, go to your WooCommerce Products in the WordPress dashboard and open one of the updated products.

Check whether the badge has been assigned successfully.

Depending on your setup, the badge may be visible in:

- the product edit screen
- Product badge section
- the single product page
- the shop/archive page





This confirms that FlexStock successfully synced the product badge from Google Sheets to WooCommerce.

Important Notes

- This feature currently works with the ***YITH WooCommerce Badge Management*** Plugin.
- You must create badges in YITH before assigning them through FlexStock.
- FlexStock only syncs and updates existing badge assignments.
- Use the correct badge value in your Google Sheet.
- Products must already exist in WooCommerce.
- If the badge does not appear immediately, wait for the next sync or run a manual sync.
