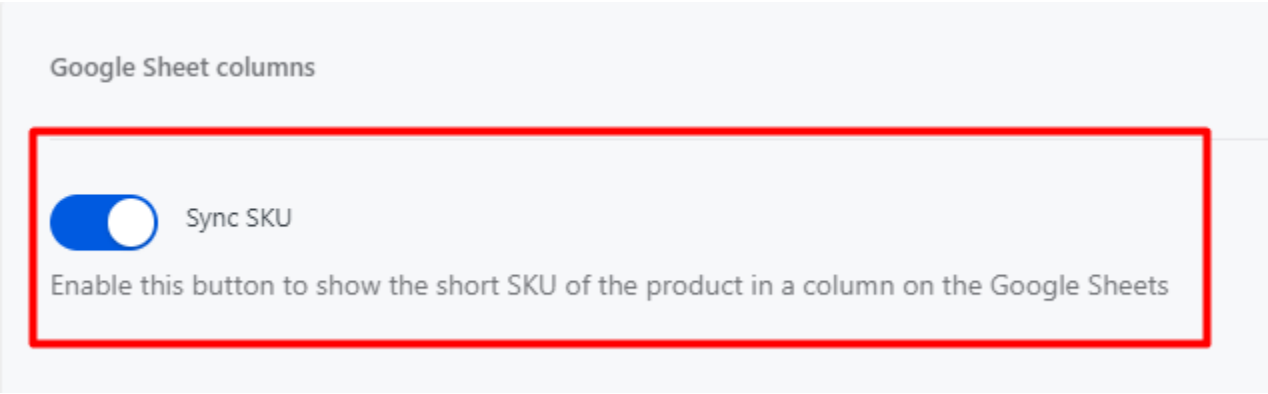
How to sync WooCommerce stock with Google Sheets

FlexStock - Stock Sync for WooCommerce with Google Sheet · https://wppool.dev/docs/how-to-sync-woocommerce-stock-with-google-sheets/

To access this feature, **you'll need the Stock Sync with Google Sheets for WooCommerce Ultimate version**. Make sure it's activated before proceeding.

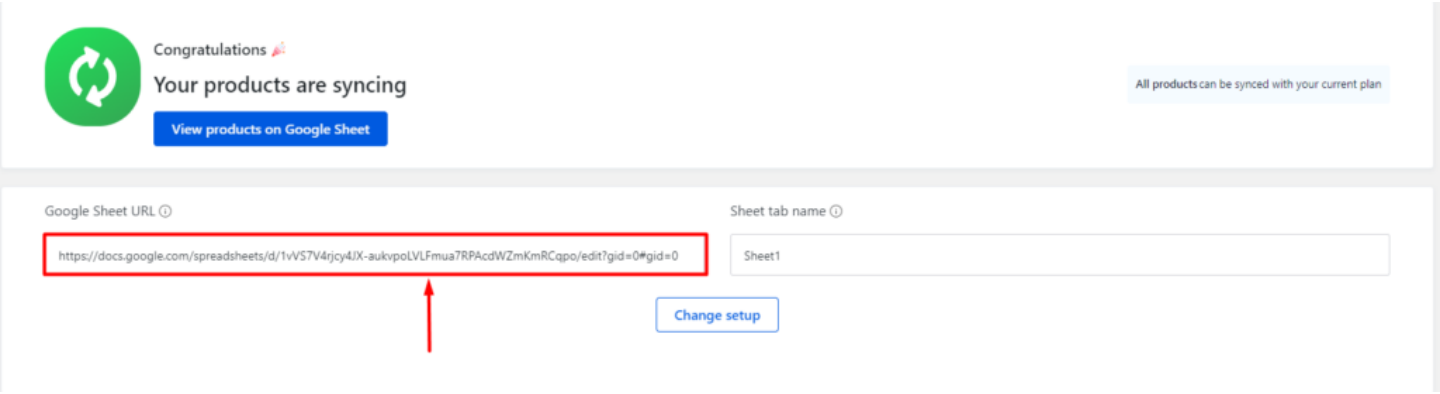
Enable SKU Sync:

- Go to your WordPress dashboard.
- Navigate to **Stock Sync Plugin →Settings → Sync SKU**.
- Enable the **Sync SKU** button.



Next,

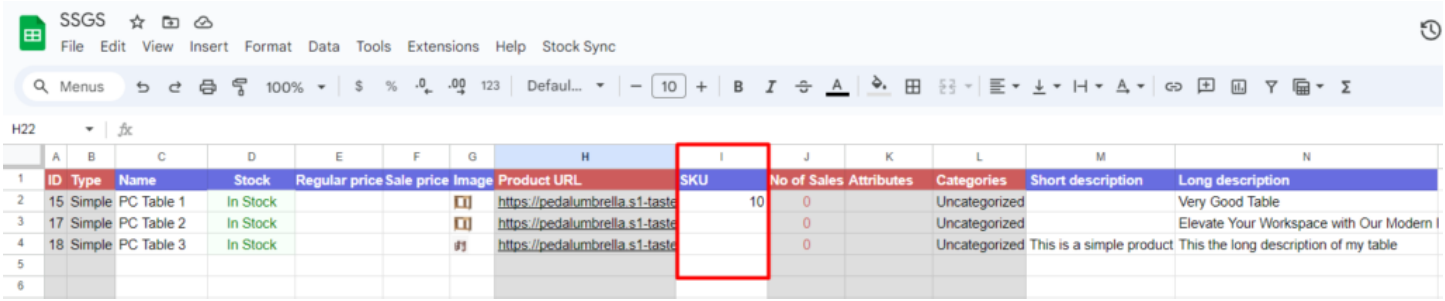
- Go to your **WordPress dashboard.**
- Navigate to the **Stock Sync Plugin Dashboard.**
- Copy the generated Sheet URL. Alternatively, you can go directly to your Google Sheet by clicking the “**View products on Google Sheet**” button



Now,

- After opening the **Google Sheet** linked to your WooCommerce store.
- Locate the column named **"SKU"** (Stock Keeping Unit).

Make **necessary changes** to your SKUs within this column.



ID	Type	Name	Stock	Regular price	Sale price	Image	Product URL	SKU	No of Sales	Attributes	Categories	Short description	Long description
15	Simple	PC Table 1	In Stock				https://pedalumbrella.s1-taste	10	0		Uncategorized		Very Good Table
17	Simple	PC Table 2	In Stock				https://pedalumbrella.s1-taste		0		Uncategorized		Elevate Your Workspace with Our Modern
18	Simple	PC Table 3	In Stock				https://pedalumbrella.s1-taste		0		Uncategorized	This is a simple product	This the long description of my table

Any modifications made to SKUs in the Google Sheet will be **automatically synced to your WooCommerce store.**
