New Default Color Preset: “Sweet Dark”

WP Dark Mode · https://wppool.dev/docs/new-default-color-preset-sweet-dark/

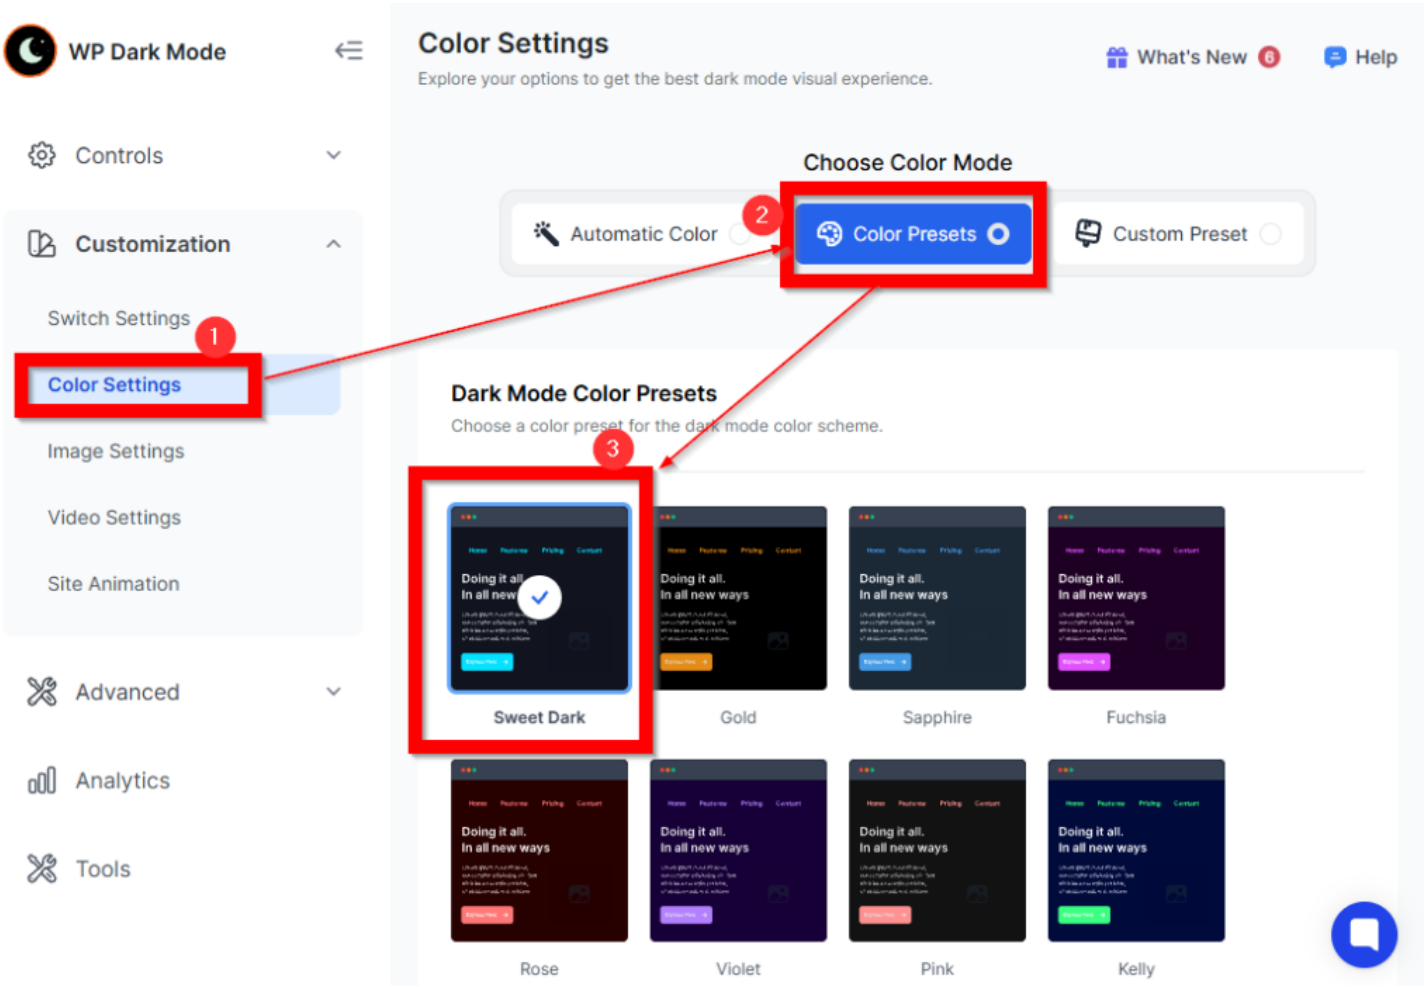
Overview

A new default color preset, **“Sweet Dark”** has been introduced to enhance the overall visual experience for all users. This update replaces the previous **Automatic Color** mode, which was the legacy default option.

Starting from this release, **all new installations** will have the **Sweet Dark** color preset applied automatically during initial setup.

Where to Find the Color Preset Setting

WP Admin → WP Dark Mode → Settings → Appearance → Color Presets



Purpose of the Update

The Sweet Dark palette ensures:

- Improved visual clarity
- Better aesthetic consistency across the plugin
- A refined first-time user experience

Impact on New Installations

- For all **new installations**, **Sweet Dark** will be selected automatically under the Color Presets settings.
- Users can still manually switch to any other available preset at any time.

Impact on Existing Installations

- Existing users will **retain their current color preset** unless changed manually.
- No settings will be overwritten during the update.

Benefits of the “Sweet Dark” Preset

- Consistent dark-themed interface optimized for readability
- Enhanced contrast for improved usability
- More modern and polished design
- Better out-of-the-box appearance for new users

Frontend Screenshot

The following screenshot illustrates how the Sweet Dark preset appears on the frontend interface:

Notes

- This change affects new installations only.

- All color presets remain fully accessible for customization.
